## WELCOME TO THE SYNCHRONIC MATRIX

The information contained herein is beyond the cybersphere, or any technological contrivance; it is information that serves as a guide book to the positive construction of the future beyond the Internet and all machine technology. For this reason, it can only be disseminated in a very specific form: that of a real book that can be taken with one anywhere on the planet—especially where there is no internet or cybersphere—like to a cave in a mountain where you are doing your telepathic meditations. And for this reason, we ask that this book not be recreated electronically in any way, including being uploaded to the Internet.

All of the original information as well as the consolidations of other teachings into the synchronic order has been due to the effort of Valum Votan (José Argüelles).

# WELCOME TO THE MASTER SYNCHRONIC CODE BOOK!

There comes a point in history where everything has been done, the amount of novelty reaches a saturation point, and the human mind becomes embedded in its own self-created clichés and cannot see out of the self-limiting blinders of the knowledge it has constructed out of its misperceptions of the world. It is precisely at such a point where a flash of genuinely new unrehearsed knowledge must penetrate the thick, dense mass of foggy consciousness.

“The codes of time are all aspects of a system of new knowledge. New knowledge by its nature is cathartic and transformative. Old knowledge must be displaced, abandoned or revised; otherwise, the new knowledge will not take root. There must be a turning in the deepest seat of consciousness for the new knowledge to become real in order to inform and nourish the most profound psychic bases of our being. This can be by turns a painful, a bewildering, or even a boring process. Painful because new knowledge confronts the spell of egoic attachments that the old knowledge casts upon us; bewildering because the new knowledge does not fit our preconceived notions of reality, both philosophically or socially; and boring, because sometimes it seems like it is just rote practice and we are not certain that it leads anywhere or that anything is really happening. The point is: once you have entered the stream of new knowledge, do not stop half way. *If you don't do it, it won't work.*”

— Rinri Project Newsletter, Vol. 1, Number 6

All of the codes contained in the Master Synchronic Code Book can be found in the 13 Moon calendar. You can start anywhere as these are continuously repeating cycles. Once started you can understand how the cycles of 13:20 repeat; then you can further your study of the Dreamspell, a pure 13:20 cycle. The most important practices are those of natural mind meditation and submission to the Creator. Hand in hand, these practices expose and diminish the power of the ego, the root of all psychic disharmony. Natural mind meditation along with practice of the synchronic order will create a genuine culture of peace, a galactic culture free from aggression and abuse of free will.

“Keeping in mind that the codes of the synchronic order hold the grids of the universal telepathic field in place, one can grasp why knowledge of these codes—celestial harmonics—makes possible the same attainment as the Galactic Maya ... ”

“What is galactic culture on Earth? It is the culture made possible through the knowledge, meditation, and application of the codes of the synchronic order.”

— *Galactic Meditation: Entering the Synchronic Order*, p. 15

## NATURAL MIND MEDITATION

"The practice for awakening natural mind is extraordinarily simple. It is the most human form and experience you can have. It is the repository of natural dignity as well. In addition, anyone can do it. You just have to sit still. The natural way is to sit on the floor, on a cushion that is firm, supports the erect back, and that allows one to sit cross-legged. On the floor, on a cushion like this is most preferable and most natural. However, if that is not possible due to your health and/or body condition, then sit on a chair with feet firmly on the floor and back erect, not leaning on the back of the chair.

"Holding the spine erect is already waking up and staying awake. The chin is just slightly down and the eyes are half-open looking down the tip of the nose to the floor. The eyes are open to avoid falling asleep or going into fantasy realms, which occurs all too easily when the eyes are closed. The point is not to escape from reality but to see and experience the natural mind without acting on it. The hands are comfortably on the knees, palms down. Holding this is the natural posture of the alert human being. Keep checking your posture as you sit. You want the spine to be erect, holding you up. The capacity to do this is what distinguishes the human from virtually every other animal. Do not slouch!

"Now, in this position, you have nothing to do but watch your breath. Breathe normally. You will become immediately aware of your thoughts. As you become aware of your thoughts—it matters not the least the nature or content of the thought—just label it "thinking," and as you exhale, dissolve the thought. At that very moment before inhaling and just as the thought is dissolved, lies the "gap" between the thoughts. It is this gap you are going to want to become familiar with and cultivate. It is the seed of natural mind and the key to your true, authentic self.

"Try doing this for half an hour, for 45 minutes, or even an hour. You have to realize that just holding this position, no matter what is occurring in your mind, you are peace. You are resisting unexamined thought impulses to do things while remaining in a position that is thoroughly non-aggressive. Imagine everyone on the planet doing this for one hour each morning before they start their day. Wouldn't the world then be at peace? The importance of holding this position cannot be emphasized enough. It is 99 per cent of this practice of experiencing your natural mind, because it is really the only way that you are going to be able to experience your natural mind—and nothing else. In addition, if you do not know what natural mind is, you cannot really say you are in natural time.

"It can be argued that you can experience your natural mind while driving a car, or doing beadwork, or playing golf or, certainly, gardening, for instance, which is true enough. But while you are involved in these activities, you are still preoccupied with something. You are not actually devoting your whole self to experiencing directly the nature of your original mind and self to the exclusion of all else. And that is the point of this training. To have the pure, raw experience of seeing your own mind—that and nothing else."

# 13:20 PRELIMINARIES

## TIME

Where is time located? You can't find it, see it, or touch it. You can see, smell, touch and taste space. The third dimension is the dimension of space. The fourth dimension is the dimension of time and mind; that is where all art comes from and that is where all art takes you.

Time is holographic. Time is fractal. Time is radial.

## THE LAW OF TIME

Time is the universal factor of synchronization.  $T(E) = \text{Art}$ , energy factored by time equals art, is the fundamental premise of the Law of Time; a corollary premise is that the velocity of time is instantaneously infinite; while the third premise is the distinction of the 12:60 and 13:20 timing frequencies (see *Dreamspell, Journey of Timeship Earth 2013*). The 12:60/13:20 presents a new level of discrimination for our mind. But this has to be coupled with the morality of time; this means we have complete respect for the autonomy of all beings and of all species and that we are living in a state of compassionate harmony. This is not enforced by laws and police but simply by the human community living in the cycles of nature. Understanding and applying these three premises constitutes the primary knowledge base of the New Time. Comprehending the Law of Time in the context of the old paradigm is also essential.

The basic staples of the Law of Time are the Tzolkin—the 260-unit 13:20 matrix which is the multidimensional gauge, index and compendium of time knowledge—and the simultaneous use of any number of calendars all synchronized in one way or another to the 13:20 matrix.

“The Tzolkin is a harmonic module which contains the cosmic code, the binary triplet figure. This is a fourth-dimensional code which completely redefines our conception of the universe.”

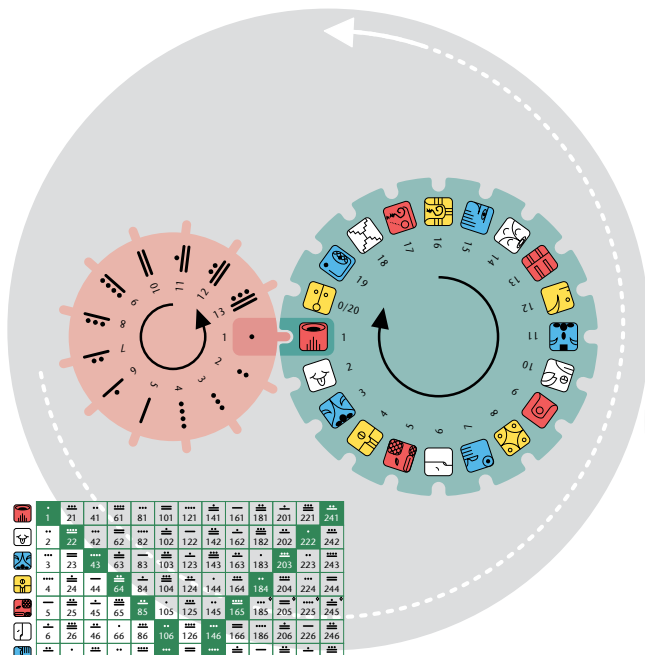

— 28 Meditations on the Law of Time, 6:7

At its height, the Maya civilization operated by at least seventeen different calendars, or more appropriately, synchronometers—“measurers of synchronicity or the synchronic order.” This is because the Law of Time recognizes the existence of time as the fourth dimension, or the synchronic order. This synchronic order is now being introduced to humanity as a whole through the Law of Time and its various tools and principles of application. The ancient Maya knew the 13:20 timing frequency. It is encoded as a 260-unit matrix known as the Tzolkin (sacred count). Its essence is kept by a continuous set of permutations of 20 icons—Solar Seals—and 13 numbers—Galactic Tones.

The Thirteen Moon calendar is perfectly synchronized with the 260-unit Tzolkin. The synchronization date is July 26. By working with the synchronic order of time, beginning with the synchronization of a 260 and a 365-day cycle, we open up the field of telepathy.

## 13:20 PRELIMINARIES

### 13:20

13 Moon/28 day Synchronometer is a perpetual, harmonic calendar. It is called the Moon calendar because it is based on the female 28-day menstruation cycle, which is also the average lunar cycle. The moon goes around the Earth 13 times in one year. This means that the 13 Moon calendar is a solar-lunar calendar that measures the Earth's orbit around the sun by the apsidal lunation cycle of 28 days. Thirteen perfect months of 28 days = 52 perfect weeks of 7 days = 364 days.

The 365th day is called the Day out of Time because it is no day of the week or month at all. This day, which falls on the Gregorian correlate date of July 25, is a day for forgiveness and the artistic celebration of life and freedom. The synchronization or New Years date of the 13 Moon calendar is July 26, and corresponds to the rising of the great star Sirius. This makes the 13 Moon calendar a tool for harmonizing ourselves with the galaxy. Of course, the Thirteen Moon calendar also synchronizes the phases of the moon in a pattern that demonstrates its regularity and order.

The principle of multiple calendar coordination is achieved by the Thirteen Moon/28-day calendar, which synchronizes the Tzolkin, the Maya long count, the lunar calendars and the Gregorian calendar. In addition, various tools exist to introduce the human intelligence to higher levels of the synchronic order, including the Dreamspell, the Telektonon, the Twenty Tablets of the Law of Time, the Rinri Project, and the Dynamics of Time, the Mystery of the Stone, the MOAP, the Wisdom Cycles and the Correct Laws of Thought. Many of these practices are contained in this Master Synchronic Code Book.

### ***DREAMSPELL, JOURNEY OF TIMESHIP EARTH 2013***

Dreamspell is from the future and is the primary tool kit of fourth-dimensional time, the complete codes and cosmology of galactic culture. Including the Book of Kin, the 260 galactic signatures of the New Dispensation, as well as the Earth family codes for the new social reorganization, the Dreamspell is the "abc's" of the new culture of time in its entirety. Master these codes in all of their primary color splendor and you've provided your body and mind with the software it needs to operate in the New Time.

# GALACTIC NOTATION, DESTINY ORACLE & 4 WATCHES

Learning the synchronic order is like learning a new language. Even the numbers are different. The synchronic order is a 20-count, also known as 0-19 code it is written in dot-bar notation which is easy to follow: a dot is one, 4 dots is four, a bar is five; five with two dots above is seven, etc. You can also see how each of the 20 seals is accorded a number in the 0-19 code. Study and meditate on the overall form, color patterns and structure. Meditate on each glyph in relation to the other and plug them into their corresponding chakras both in your body (human holon) and the planet (planet holon).

“In the Dreamspell Oracle, patterns of third-dimensional relations are functions of fourth-dimensional time. In the third dimension these patterns are called synchronicities. In the fourth dimension, these patterns form a single radial matrix. In a radial matrix, every part is related equally to every other part.”

– *Dreamspell: Journey of Timeship Earth 2013, p. 20*

“As you increase your own synchronicity, you learn time magic and become a Dreamspell code-breaker. The art of Dreamspell code-breaking lies in your ability to find different ways to make every day your own field of play, and to find as many ways as you can to extend your relationship to as many other people and events as possible.”

– *Dreamspell: Journey of Timeship Earth 2013, p. 21*

## NET TIME, 4 DAILY WATCHES

For added play, you can divide your days into 4 daily watches (NET Time), according to the daily oracle. Throughout the day be aware which “watch” you are in.

- 4 daily watches
- 4 seasons per year
- 4 year cycles
- 4 dimensions
- 4 phases of the moon
- 4 psi bank plates

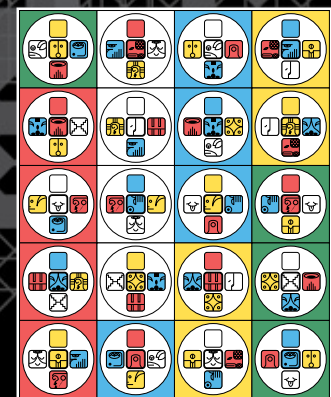

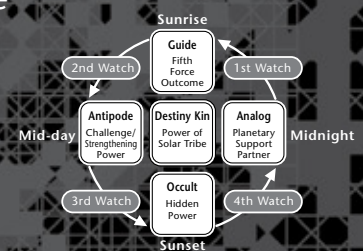

“The unit of one kin divides the rotational cycle of the Earth in its orbit into four distinct phases daily and annually.”

– *Time and the Technosphere, p. 125*

Four directions and corresponding colors:

- Red: East - Initiates
- White: North - Refines
- Blue: West - Transforms
- Yellow: South - Ripens

# HARMONIC ARRANGEMENT (CLANS), CHROMATIC ARRANGEMENT (EARTH FAMILIES)

**Harmonic:** Four cosmic root race cooperative time cell code; five time cells coded with one each of thirteen galactic tones create the 65 harmonics of the Book of Kin; in the inverse relation to each other, 65 harmonics create the code of the Harmonic Index, occult partners and quartets. (*see Dreamspell: Journey of Timeship Earth 2013*)

**Clan:** Primordial galactic colonization team based on one of four galactic elements and corresponding to one of the four chromatics: yellow fire clan, red blood clan, white truth clan, and blue sky clan. Right Hand: Yellow Fire Clan; Right Foot: Red Blood Clan; Left Hand: White Truth Clan; Left Foot: Blue Sky Clan.

**Chromatic:** Quality of fourth-dimensional time as continuously recirculating genesis; five-kin sequence where first and fifth kin are the same color; dynamism of the four color constants, which evoke and are moved by the overtone fifth.

**Earth Family:** One of five sets of four color-coded seals; combined with thirteen galactic tones, codes solar birthday according to 52-year castle of destiny; horizontal code of Planet Holon.

Polar Kin: Sound the chromatics

Cardinal Kin: Establish the genesis

Core Kin: Mine the tunnels

Signal Kin: Unravel the mystery

Gateway Kin: Open the portals

**Cosmic Root Races (color family):** Fourth-dimensional genesis of human races according to the color code: red, white, blue, yellow; basis of time cell rotation of 20 solar tribes; destiny fulfilled as rainbow nation of Timeship Earth 2013.

**Rainbow Nation:** The four cosmic root races awakened for the purpose of launching Timeship Earth 2013; Dreamspell players who take planetary command.

Each of the 20 seals codes a planet. For every planet there are two seals: galactic in-breath and solar out-breath. Galactic in-breath and solar out-breath represent the circulation of time within the solar system or heliosphere.

Each planet contains a Bode number, the orbital ratios of the planets to each other in relation to their distance from the sun.

# HUMAN HOLON, PLANET HOLON, GK IN-BREATH/SP OUT-BREATH

**HOLON:** Structure of fourth-dimensional universe; fourth-dimensional body of any evolving form; fourth-dimensional counterpart of third-dimensional human ego, called human holon.

**HUMAN HOLON:** the fifth force, 20 solar tribe coding which connects fourth-dimensional body with third-dimensional space suit.

**THE PLANET HOLON:** (otherwise known as the Arcturian Pacification Map) is divided into 20 zones, each zone corresponds to one of the 20 solar seals. These can be studied in many different ways. The Planet Holon is also coded into the human being. The same 20 seals that are around the planet we can locate in our fingers and toes. We also have five major internal centers: the crown (polar), throat (cardinal), heart (core), solar plexus (signal) and root (gateway). The five Earth families incarnate all of the evolutionary cosmology of the 20 seals, the 5 time cells, the 10 planetary orbits and the 2 flows.

## **BODY AS WAVESPELL:**

13 tones = 13 articulations (major joints in the body)

Magnetic ankle, lunar knee, electric hip, self-existing wrist, overtone elbow, rhythmic shoulder, resonant neck, galactic shoulder, solar elbow, planetary wrist, crystal knee, cosmic ankle.

## **CHRONOSPHERE:**

"...Around the planet is an invisible sphere called the magnetosphere. The magnetosphere includes the electromagnetic field. This electromagnetic field holds all the pulsations of cosmic energy as well as all the frequencies of time. When the electromagnetic field is functioning fourth-dimensionally, we can speak of the chronosphere.

"The chronosphere is the sphere of time that keeps the planet in time. This chronosphere is related to the phenomenon of the planet's information and memory storage retrieval system. The chronosphere is the fourth-dimensional field created by the Planet Holon turning in resonance with the third-dimensional planet body."

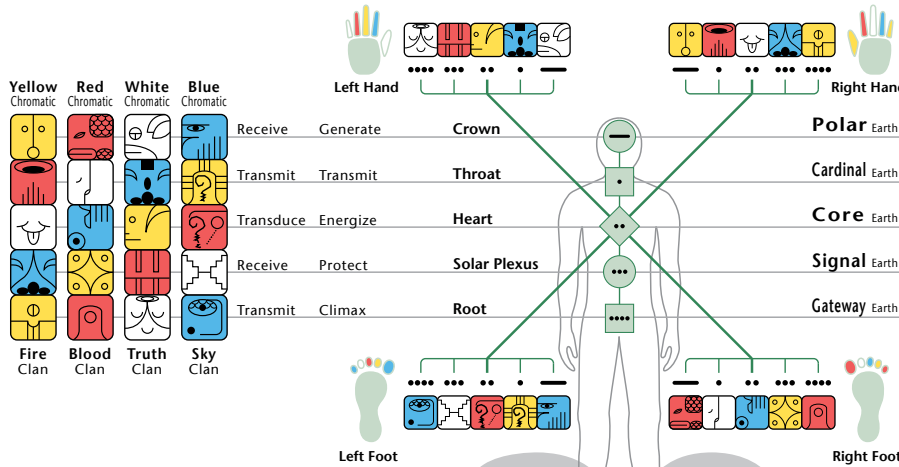

— *28 Meditations on the Law of Time, 6:9*

## **CONSCIOUSNESS IS A FUNCTION OF INTERPLANETARY ORBITS:**

"The purpose of a planet is to hold its orbit in relation to the orbits of other planets and altogether to the sun or stellar unit in an evolving star system. The capacity of a planet to hold its orbit is a function of the intelligence consummated in the planet. As holder of different functions of intelligence, the planet orbits harmonize the stellar intelligence in its patterns of galactic exchange."

# WavesPELLS

The wavespell is a standard fractal unit of measure; a form constant of 13 units, representing a fourth-dimensional, 13-tone cosmology, or 13 tones of creation. Each of the 13 tones of the wavespell represents a discrete cosmological sequence, which describes a process of ongoing creation. Through conscious attunement to the wavespell, the self-reflective component of the planetary system, the noosphere, will recapitulate in unceasing waves the 13-tone cosmology of the fourth dimension.

“The wavespell is the primary template for evolutionary advancement provided by the codes of fourth-dimensional time. To understand the wavespell in its entirety is to reconstitute the epistemological basis and categorizations of human knowing.”

– *The Call of Pacal Votan*, pp. 55-56

“Through following the 13-tone cosmology of movement, the 20 tribes and four root races are capable of traveling anywhere through time, and entering other dimensions.”

– *The Call of Pacal Votan*, p. 62

The adventure wavespell can be used to plot action over any cycle of time operating by the wavespell: 13 days, 13 weeks, 13 moons, 13 years, 13 baktuns, etc.

## **PULSARS AND PULSAR CODE**

The integration of the wavespell field of time is a function of the four pulsars. The pulsars show the unity of the four dimensions through time and hold true for any scale, 13 days, 13 moons, 13 years, etc.

“The cosmology of pulsars is the cosmology of interdimensional creation by universal telepathy. As the science of extending universal telepathy more profoundly into the present moment, pulsar cosmology is the intelligence factor informing the g-force or galactic beams.”

### **First-Dimensional Life Pulsar—Tones 2, 6, 10**

### **Second-Dimensional Sense Pulsar—Tones 3, 7, 11**

### **Third-Dimensional Mind Pulsar—Tones 4, 8, 12**

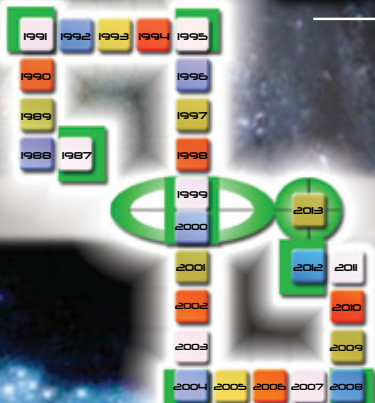

Encompasses the realm of mental and social development, which can now be studied or comprehended as the realm of cooperative cosmic order.

### **Fourth-Dimensional Time Pulsar—Tones 1, 5, 9, 13**

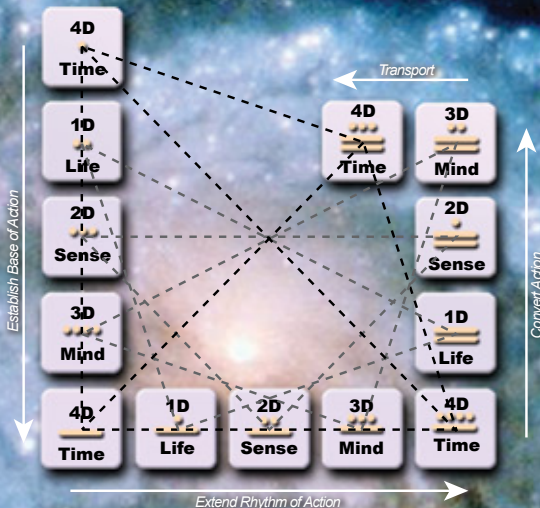

Being of time and mind, the fourth-dimensional time pulsar unifies purpose through command, formalizes action and magic flight. The fourth-dimensional pulsar also informs and regulates the other three pulsars, which constitute three interactive triangular planes.

## WAVESPELLS, CASTLES AND SEASONS

“The five castles and 260 galactic gateways of the 260-kin galactic spin present a complete map of the geography of galactic time.”

– *Dreamspell, Journey of Timeship Earth 2013*, p. 30

Wavespell cycles: 13-day cycles:  $13 \times 20 = 260$

Harmonic Runs: 20-day cycles, with 5 time cells each:  $20 \times 13 = 260$

Castle Cycles: 52-day cycles:  $52 \times 5 = 260$

Galactic Seasons/Spectrum: 65-day cycles:  $65 \times 4 = 260$

Castles are used to map different time ratios. For instance, each castle = 52 kin or 52 steps of the Dreamspell Genesis. Each wavespell accounts for 1,300 years, each castle for 5,200 years. There are 26,000 Dreamspell years allotted for Timeship regeneration of the planet. During the 26,000-year cycle, three geneses occur, marking different stages of human consciousness:

Dragon Genesis: 13,000 years

Monkey Genesis: 7,800 years

Moon Genesis: 5,200 years

## 20 WAVESPELLS OF 13 DAYS

“Each of the 20 wavespells of the mighty Timeship Earth accounts for 13 centuries of human reckoning; 4 magnetic gates, four wavespells in all; each castle accounts for 52 steps or 52 Dreamspell centuries.”

– *Dreamspell, Journey of Timeship Earth 2013*, p. 2

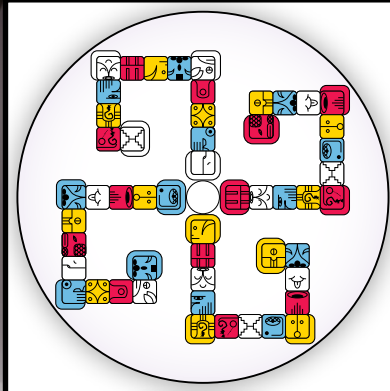

“Within each castle are four color coded wavespells. Each wavespell sequence describes the inner workings of a specific castle in the creation of the ongoing cosmogenesis.”

– *The Call of Pacal Votan*, p. 69

## Dreamspell Genesis

= 5 Genesis Memory Cells: "Transmit", "Alpha Transduce", "Equalize", "Omega Transduce", "Receive"  
(see Dreamspell, Journey of Timeship Earth 2013)

## DREAMSPELL GENESIS & GENESIS MEMORY CELLS

The Dreamspell Genesis represents 20 wavespells equivalent to the 26,000-year evolutionary journey. Each unit represents one wavespell equivalent to 1,300 years. There are 10 wavespells on the outer units and 10 wavespells on the inner units. This particular Earth cycle begins in 3187 B.C. and ends in 2013 A.D.

“To restore and maintain the radial nature of solar-planetary time, the Dreamspell geneses and the 5 castles of the Timeship are organized into 5 genesis memory cells. Within each of the 5 memory cells the 20 tribes are organized according to antipode pairs. These pairs follow the laws of radial time.”

– *Dreamspell, Journey of Timeship Earth 2013*, p. 53

## FOUR GALACTIC SEASONS

“The fifth-dimensional timing factor is the principle of the four galactic “seasons” or Spectra which describes the primal creative powers of the fifth force. The fifth- to fourth-dimensional movement of the four galactic seasons coordinates continuous fourth- to third-dimensional galactic spins.”

– *The Call of Pacal Votan*, p. 69

Each spectral (spectrum) season consists of 13 five-kin chromatics or 65 kin. Each Galactic Spectrum is divided into three 20-day cycles plus one 5-day cycle, coded by the four polar kin: Serpent (red), Dog (white), Eagle (blue), and Sun (yellow), always in the sequence of tones: 3 (establish-20 days), 10 (extend-20 days), 4 (convert-20 days), 11 (transport-5 days).

## VINALS

Vinals are 20-day cycles that recount the sequence of the cycle of solar wisdom. Vinal cycles start at the beginning of the year and change every 20 days on the yearly solar seal. For example: this is the Red Magnetic Moon year so the vinal shifts every Moon day. There are 18 vinals (x 20 days = 360 days) + a five-day cycle called the Uayeb (= 365 days), a time for purification and reflection. Names from the vinal solar cycle are derived from the original Maya. Together the vinals constitute the pure solar cycle or Haab, and the affirmations describe the wisdom of the sun as a single, multiply articulated thought form.

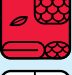

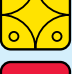

## Self-Replicating Cosmology

This 20-day meditation cosmology is a way of imprinting the basics of a rare Dzogchen (Great Perfection) meditation text which emphasizes the “Absolute is already complete in itself.” This is a great supplement to the daily practice of natural mind meditation.

Since the 20 solar seals repeat continuously thirteen times every 260 day cycle ad infinitum, to follow this practice on a daily basis is to participate in a self-replicating cosmology of enlightenment meditation.

The practice has already been perfected, but without practice you will not know that.

# 19 Code

The 19 Code is based on the Quranic Revelation 19=260, a higher-dimensional mathematical code to establish a noospheric resonance for the closing of the Cycle 2012. The basis of the 13 gates of redemption is the 19 strand that perfectly codes the Tzolkin. Beginning at the lower left and continuing to the upper right, the 13 multiples of 19 within the Tzolkin make a perfect diagonal strand, the only such one in the Tzolkin.

Moreover, in the dot bar vigesimal notation every multiple of 19 adds up to 19:

**VIGESIMAL NOTATION**

Vigesimal notation is written in vertical levels. The first level represents multiples of 1; each level above increases by the power of 20. Seven levels are shown here:

- 7th Level • = 64,000,000 (20<sup>6</sup>)
- 6th Level • = 3,200,000 (20<sup>5</sup>)
- 5th Level • = 160,000 (20<sup>4</sup>)
- 4th Level • = 8,000 (20 x 20 x 20)
- 3rd Level • = 400 (20 x 20)
- 2nd Level • = 20 (20 x 1)
- 1st Level • = 1

One dot in the 1st level = 1, one dot in the 2nd level = 20, one dot in the 3rd level = 400, one dot in the 4th level = 8,000, etc.

Example: The number 133 (19 x 7) in vigesimal dot-bar notation looks like:

*One bar + one dot (6) in the 2nd Level represents 120 (6 x 20)*

*Two bars + three dots (13) in the 1st Level represents 13 (13 x 1)*

$$19 \times 1 = 19 = \overline{\text{⋯}} = 19$$

$$19 \times 2 = 38 = \overline{\text{⋯}} = 18 + 1$$

$$19 \times 3 = 57 = \overline{\text{⋯}} = 17 + 2$$

$$19 \times 4 = 76 = \overline{\text{⋯}} = 16 + 3$$

$$19 \times 5 = 95 = \overline{\text{⋯}} = 15 + 4$$

$$19 \times 6 = 114 = \overline{\text{⋯}} = 14 + 5$$

$$19 \times 7 = 133 = \overline{\text{⋯}} = 13 + 6$$

19 is the supreme number that underlies the mathematical code of the Quran. The numbers of verses of the 6 suras (Chapters) of the Quran that are multiples of 19 add up to 260. Hence 19=260.

“The 0-19 code is defined as the cosmological equation (= fractal equivalence), establishing the base matrix of 260 time vector potentialities, which may be extended into infinite grades and levels according to the power of fractal ratios. The base matrix of 260 time vector potentialities defines the cosmological complex of fourth-dimensional time as a finite but infinitely extensive order, a transcending of linear logic, enfolded in logic of evolutionary unfolding.”

13 Gates of redemption (19=260)

THE SEVEN MAJOR ARCANUM  
OF THE LAW OF TIME

# Throne

## 1. THE THRONE: YELLOW DALI, CUBE TOP

Defines the view, the perspective of the Divine One, the Supreme Creator whose plan of Universal Creation we are fulfilling. The view from the Throne is entrusted to demonstrate the perfection of the human soul to be like "the Sun and its brightness." "I feel the heat."

# Avatar

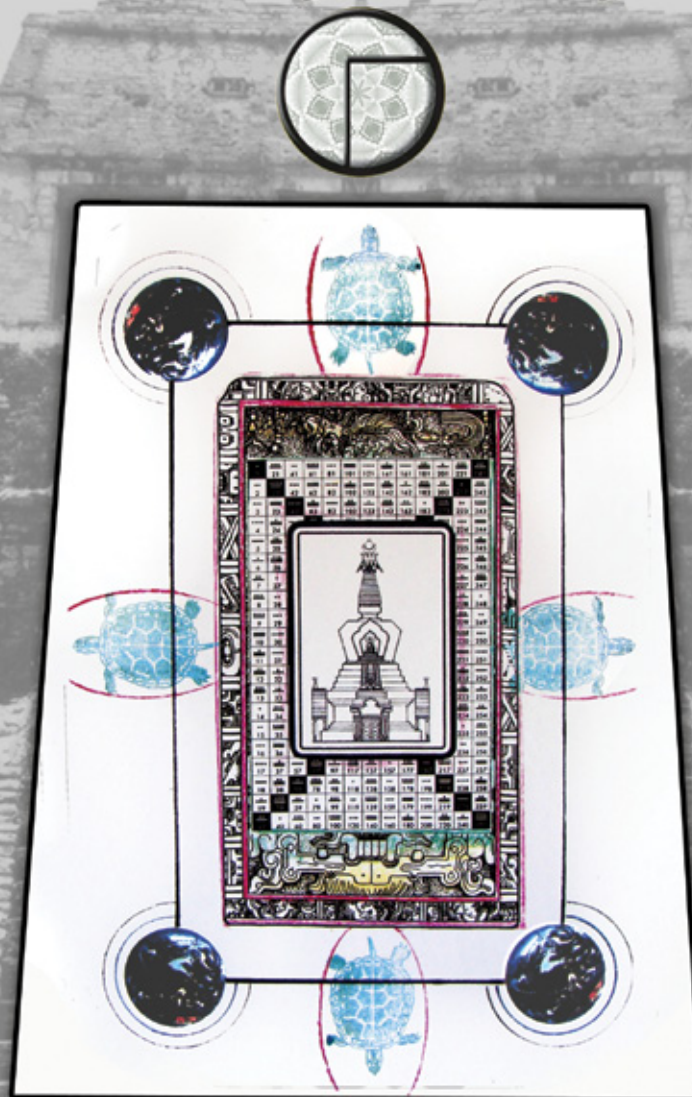

## 2. THE AVATAR: RED SELI, CUBE BOTTOM

The Avatar is the principle of divine descent by which the commands of the Throne are embodied and carried out on the physical plane. The power of the Avatar is the emblem of the soul's mystic flight "And by the moon and who follows it." "I see the light."

# Mystery

### 3. THE MYSTERY: WHITE GAMMA, CUBE FRONT.

The Mystery is the realm into which the Avatar is plunged to discern by Divine Intelligence the use of his or her power on behalf of the enactment of the divine principle embodied by the Avatar. The power of the Mystery is given, that through divine intelligence the soul's forgotten cosmic serpent wisdom might be likened to the "day when it reveals the sun."

"I attain the power of peace."

# Initiation

## 4. THE INITIATION: BLUE KALI, CUBE BACK

The Initiation is the process undergone by the seeker of knowledge, as exemplified by the Avatar. The initiation catalyzes the soul from sensory input to telepathic output. The task of the Initiation is given so that the lower instincts might be subjugated and the higher harmony prevail.

The Initiation is "like the Night when it conceals."

"I catalyze the light-heat within."

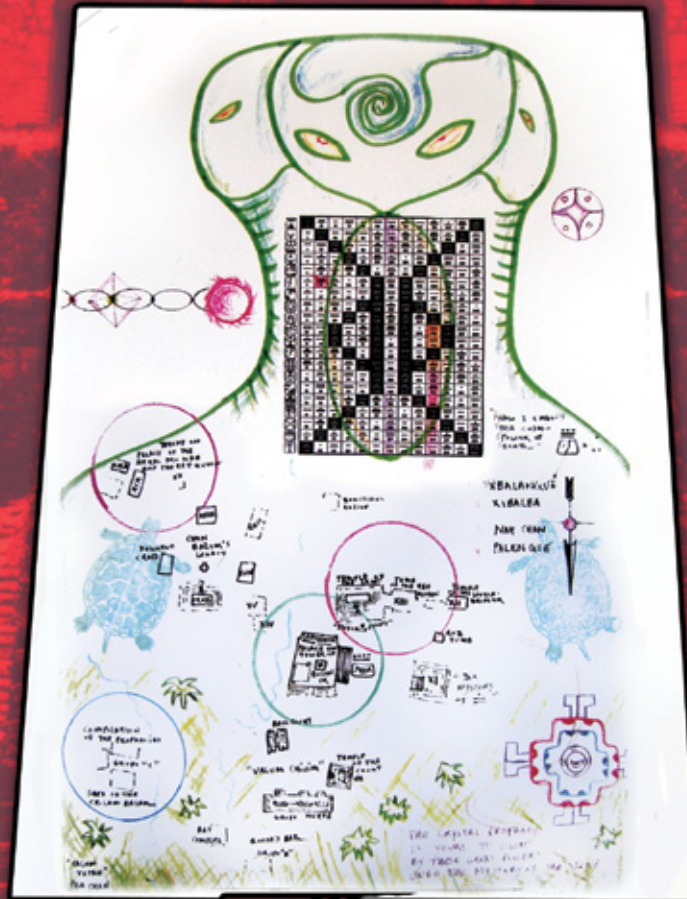

# Time Space

## 5. THE TIME SPACE: YELLOW ALPHA, CUBE RIGHT

The Time Space is the knowledge of the divine principle for which the soul has incarnated. The Time Space is a divine science which liberates the soul by illumining the architecture of the inner temple. The divine science of the Time Space is provided that the soul might construct its temple as a reflection of "the sky and He who constructed it." "I release the double extended electron at the South Pole."

# Transcendence

## 6. THE TRANSCENDENCE: RED LIMI, CUBE LEFT

Transcending is the knowledge that the end is in the Crown and the divine spirit draws the soul upward through the crown only that at the root the tunnel may be opened that leads to heaven so that heaven may be brought to Earth. The knowledge of the Transcendence is given from highest heaven back to "the Earth and He who spreads it" "I purify the Mental Electron at the North Pole."

# Cube

## 7. THE CUBE: WHITE SILIO, CUBE CENTER

The Cube is the knowledge that unifies, synthesizes, harmonizes and synchronizes divine wisdom so the soul is cubed in its own perfection. The cubing of the Soul is in resonance with the Heptagonon of Mind of Earth. By the Grace of "Him who perfected and proportioned it," "I discharge the Mental Electron Neutron to the center of the Earth."

# The 24 Runes of the Elder Futhark and the Seven Major Arcanum of the Law of Time

The practice of the 24 Runes of the Elder Futhark represent the culminating revelation of the Cube of the Law (See *20 Tablets of the Law of Time*). It is the 24 Runes that seal the six radial plasmas, Dali through Limi, and thereby grant an authentic aboriginal continuity to the radion we are releasing.

The 24 Elder Futhark are coded precisely to the 24 Psi Nimboid Membranes (see *Earth Ascending*, Map 29 and graphic at right). The Psi Nimboid Membranes are arranged in four sets of six membranes each, each set corresponding to one of four Psi Plates (see also, page 47). The function of the Psi Nimboid Membranes (PNMs) is to regulate and process the flow of information within the Psi Bank, understood as the collective planetary telepathic brain. The Psi Nimboid Membranes actually articulate the flow of "PSI" as a single mental stream with infinite variations. By coding the 24 PNMs with the Elder Futhark Runes according to the Law of Time, the higher collective mind is awakened into the structure of a unitive 24-stage process, otherwise known as the primary aboriginal grammar of telepathy.

Each Psi Plate corresponds to one of the four weeks of the moon (shown at right) as well as one quarter of the planet body and one season. (Ex: Week 1: Afro-Eurasian Plate, Spring, Week 2: Pacific Plate, Summer) Note how the movement of the Futhark runes is toward the center, Equator, the seventh day of each week.

The Cosmology of Time is based on the Power of Seven and is known as the Major Arcanum of the Law of Time. Arcanum refers to mysterious knowledge known only to the initiate, or one having the key. The Major Arcanum of the Law of Time, the Cosmology of Seven, underlies the mysterious text referred to by the Chilam Balam, or Jaguar Priests, as the Book of the Seven Generations.

## SEVEN MAJOR ARCANUM

In this cosmology, the seven key points are held by images that are coded by one each of the Radial Plasmas and constitute a cubic lattice.

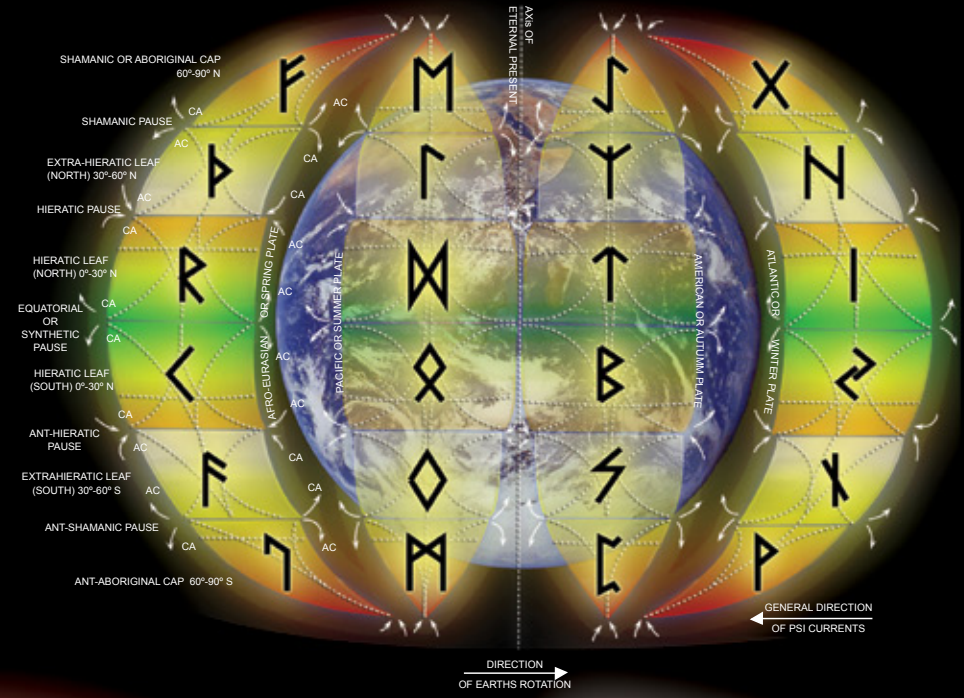

The form and movement of the cosmology of the Major Arcanum assume the shape of the Heptagonon of Mind or Primal Cubic Parton, in which the relation of numbers 1 and 2 describe the top and bottom of a cube; numbers 3 and 4 describe the front and back sides of the cube; numbers 5 and 6 describe the right and left sides of the cube; while the number 7 defines the center point of the cube.

You can visualize this cube as fitting perfectly around the DNA Cube (see page 57), like a glove, where the Futhark Rune seals the corresponding Radial Plasma (Ex: Day 13, Limi, left side of the cube, sealed by Othala).

**DAILY PRACTICE:** For all four weeks of each moon, one Futhark Rune codes the days Dali-Limi, the seventh day, Silio, represents the center and is a void day, shown at 0°. All that is necessary regarding the meaning of the Runes is to meditate on the simple slogan daily.

# SEVEN RADIAL PLASMAS

"Within the prana, or the vital breath are the different primary plasmas, known as the seven radial plasmas ... Once consciously breathed in, these plasmas may be directed to different chakras, where they provide the energetic psychotelepathic fuel." — *Cosmic History, Vol. 1*

According to Cosmic Science, the seven radial plasmas are the primary electrical charges of creation. They continuously permeate and circulate through all of creation. In our own being they are coordinated through the seven chakras. Through the daily 7:7::7:7 practice, we can activate the plasmas in our chakras with a corresponding affirmation. Read and contemplate p. 80-81 of *Cosmic History Chronicles, Volume I* carefully. Meditate on each of the seven radial plasmas as being a specific telepathic message unit. (It is also helpful if you have a 7:7::7:7 kit as it will give you further insight and practices)

## SEVEN LEAVES OF THE CUBE

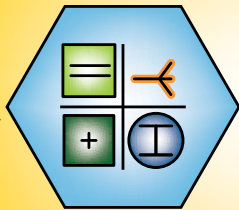

Each of the Major Arcanum codes one each of the seven leaves of the cube. Each leaf contains the radially unifying synchronic order codes for four of the 28 days of the moon. Each leaf is like a small synchronic order encyclopedia entry providing a major study tool for serious Earth Wizards. The seven leaves and the days they code are as follows:

1. Leaf of the Throne: Days 1, 8, 15, 22 (Dali)
2. Leaf of the Avatar: Days 2, 9, 16, 23 (Seli)
3. Leaf of the Mystery: Days 3, 10, 17, 24 (Gamma)
4. Leaf of the Initiation: Days 4, 11, 18, 25 (Kali)
5. Leaf of the Time Space: Days 5, 12, 19, 26 (Alpha)
6. Leaf of the Transcendence: Days 6, 13, 20, 27 (Limi)
7. Leaf of the Cube: Days 7, 14, 21, 28 (Silio)

# SEVEN MORAL CATEGORIES OF ENLIGHTENED BEHAVIOR

“Everything is by the power of seven. The Seven Moral Categories of Enlightened Behavior are the seven categories of behavior of being a bodhisattva. The Bodhisattva is one who totally dedicates his or her life to the enlightenment of all beings. This daily practice according to the day of the week is for the purpose of shedding the self-importance of ego and disciplining the mind”

– 28 Meditations on the Law of Time

The Seven Moral Categories of 10 precepts each are divided into four sets.

I. Awakening and Cultivating Bodhi (the seed of enlightenment present in all beings)

*Dali 1. The Ten Abodes.* For clear seeing of the working basis of bodhisattvic behavior

*Seli 2. The Ten Practices.* For direct understanding of the working basis of bodhisattvic behavior.

*Gamma 3. The Ten Dedications.* These are the vows that define the tireless dedication of the bodhisattva.

II. The Path of the Bodhisattva

*Kali 4. The Ten Stages.* These are the actual ten stages (bhumis) of the bodhisattva's enlightenment.

III. Practices and Benefits

*Alpha 5. The Ten Concentrations.* These are the meditative powers or creative samadhi of the accomplished bodhisattva.

*Limi 6. The Ten Superknowledges.* These are divine powers granted to the bodhisattva owing to supreme exertion and purity of vows.

IV. Terms of Agreement

*Silio 7. The Ten Acceptances.* These ten categories define the bodhisattva's code of behavior while operating in the third dimension physical plane of reality.

# TELEKTONON

The purpose of daily Telektonon play is to learn how to operate by a set of coordinates that define the nature of telepathic consciousness as the interplay of 5 circuits that connect the 10 planetary orbits. These coordinates are being operated from our being, which finds itself in the third circuit, namely Earth-Uranus.

The primary order of the universe is telepathic in nature. From telepathy arises the order of atomic structures—Telektonon defines the 140 coordinates of the 5 circuits which integrate telepathic and atomic order and the preconscious and subliminal conscious fields of influence.

The Telektonon is based on the prophecy of Pacal Votan, Telektonon-Earth Spirit Speaking Tube. The “Game of Prophecy” utilizes a board (fourth-dimensional solar system circuit map), 52 cards and 13 moving pieces. The pieces are laid out according to the daily fifth force oracle. The purpose is to construct on a 28-day basis the stairway to heaven and the history of the lost planets, concluded by the “victory of the war of the Heavens on Earth” by 2012. Originally intended for the Seven Years of Prophecy the Game is updated for the Seven Years of the Mystery of the Stone, 2004-11. Its ultimate purpose: to provide the restoration of universal telepathy via the 28-day cycle consciously lived.

## TELEKTONON AND THE BOOK OF REVELATION

In the Seven Major Arcanum of the Law of Time, as well as the Telektonon, we are coordinating different spiritual teachings. From day 1-22 of the Telektonon—each day corresponds to one chapter in the Book of Revelation. The Book of Revelation is the 27th book of the New Testament, and the last one. 27 is the third power of nine in the 20 Tablets. There are 22 chapters of the Book of Revelation to be read for the first 22 days of each moon.

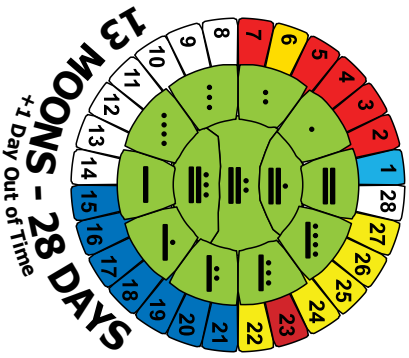

“The Telektonon playing board is a map of our solar system understood from the point of view of the cosmology of telepathy. This map divides the playing board into a set of fields, flows and circuits. The planetary orbits maintain what we call different activities of the mind or consciousness. The planetary orbits themselves are held by a gyroscope, which we call a planet. Our planet Earth, Velatropa 24.3, is one such gyroscope.”

— *Telektonon*

## CUBE OF THE LAW

A key component of the Telektonon 28-day Journey is the Cube of the Law. This corresponds to days 7-22 of every moon, and on the playing board is represented by a 4 x 4 matrix known as the Warrior’s Cube Journey. There are many levels and layers of meaning to this journey and the 16 cube positions, including different affirmations as well as stages of fractal time compression. The positions themselves recapitulate the first sixteen solar seals—Dragon-Warrior, as well as planes of consciousness and primordial planes of mind, spirit, will and Telektonon (wisdom).

The Cube Journey is key to practices of the Telektonon Prophecy, the 20 Tablets of the Law of Time, the Rinri Project and the Mystery of the Stone.

## 13 CLEAR SIGNS OF PACAL VOTAN

The Thirteen Clear Signs are the thirteen galactic signatures along the four edges of the sarcophagus lid of the tomb of Pacal Votan (*see Telektonon manual, pp.25-26*). This is a living prophecy, so in many ways the meaning of the Clear Signs depends on your awareness of being in the synchronic order and what occurs at those points in the synchronic order, or even, whom you might identify as being one of those clear signs.

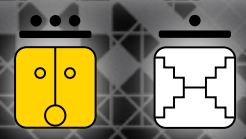

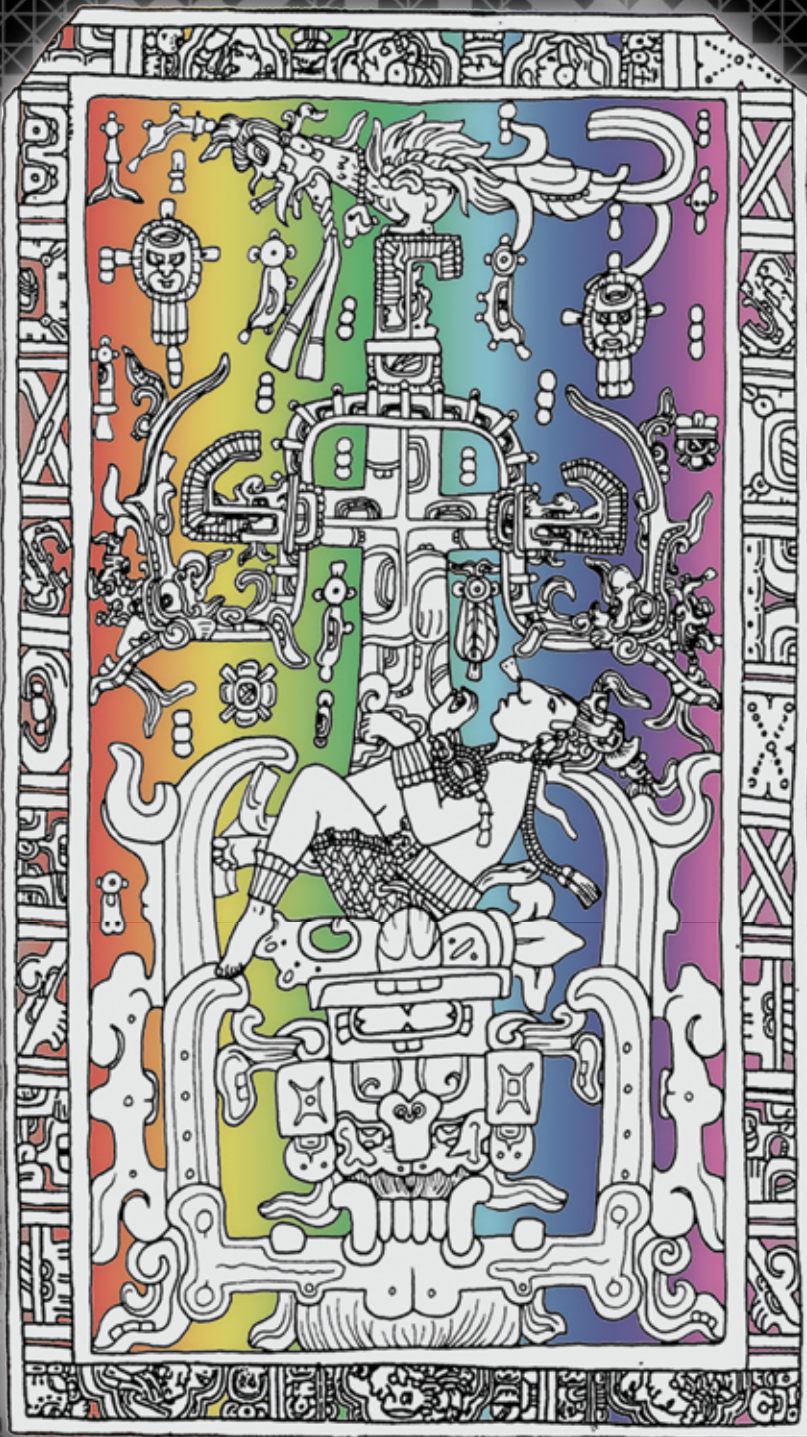

The sum of the tones of the thirteen signs, 78 ( $13 \times 6$ ) is the same as the sum of the 13 Worldbringer, the last sign, when you multiply its code number 6 by its tone 13. This sum yields a further hidden clear sign, Kin 78, Cosmic Mirror which closes the Wavespell of Death (thirteenth tone, wavespell six). This means that 78 is a key synchronic fractal:  $7:8 = 7.8 \text{ Hz.}$ , Earth resonant frequency;  $780 =$  number of days in synodic cycle of Mars; and in general as sixth power of thirteen, 78 is a fractal key to the sixth-dimensional light codes. The South edge 8 Sun and 6 Mirror are the birth and disincarnation of Pacal Votan, tonal sums  $14 = \frac{1}{2} 28$ .

The first four signs on the eastern edge are divided into two interlocking pairs, 5 Earth and 9 Hand (tonal sums = 14) and 7 Warrior and 7 Sun (tonal sums = 14). Then, again the sum of kin numbers: 5 Earth, kin 57 ( $3 \times 19$ ) plus 9 Hand, kin 87 ( $3 \times 29$ ) = 144, key number of prophecy Telektonon; while kin numbers of 7 Warrior, kin 176 + 7 Sun, kin 20 = 196 =  $28 \times 7$  or 14 squared = Bode number of planet Uranus (*see Telektonon manual p. 50*). This is the key to the 28 day cycle divided into 4 sets of 7 ( $7:7::7:7$ ). 196 is also the sum of Bode numbers of planets of Tower of Babel: Mars 16 + Maldek 28 + Jupiter 52 + Saturn 100 = 196. Note that  $28 \times 7 =$  Maldek 28 x Venus Bode number 7.

The tonal sums of the first four signs of the eastern edge (28) combined with the tonal sums  $2 + 11 (=13)$  of the other two signs on the eastern edge refers to the prophecy of the 13 moon 28 day calendar. 11 Serpent refers to the destruction of Maldek, 2 Human is the fourth kin of the mystic Harmonic 33 and refers to the redemption of the human through the 13 Moon calendar, hence Lunar Human. 11 Serpent also refers to Carlos Salinas Gortari, the President of Mexico when the Telektonon Prophecy was decoded (1993-94).

The 2 Worldbringer on the North edge is the key because it is the only sign there, and refers to the destruction of Mars. The tonal number 2 is the factor which multiplies the 14 to become 28, and the 7 of the first two signs of the west edge to become 14. The 3 Monkey combined with 4 Dog, tonal sums = 7, directly opposite the two signs on the eastern edge whose sums are 13. 13 and 7 are the two key numbers of the Tzolkin ( $=20$ ). The combination of 1 Sun with 13 Worldbringer refers to the resurrection in the new time (tonal sums again = 14).

When you add all of the kin numbers of the thirteen clear signs, they equal 1248, a very magical number which is also a factor  $78 = 1248 = 78 \times 16$ , Martian Bode number and key to the 16 unit Cube of the Law (*Study 1248—it is an amazingly harmonic number and can be factored by perhaps 20 other numbers*).

# RINRI PROJECT & THE CIRCUMPOLAR RAINBOW BRIDGE EXPERIMENT

“Practically, the Rinri Project is a telepathic experiment synchronized with two daily patterns: the Telektonon playing board, marking positions within the 28-day biotelepathic cycle; and by the Dreamspell Human and Planet Holons which register the biogeological flow of fourth-dimensional time according to the 73 overtone chromatics of the biomass constant within the form of the 13 Moon calendar. — *The Complete Guide to the Rinri Project*, p. 14

Utilizing the Telektonon 28-day circuit and inclusive of the 16-unit cube of the law (days 7-22), the Rinri project interfaces the 260-day cycle with the 364-day 13-Moon cycle in four-year sequences through an interactive telepathic activity that literally opens up the psi bank—the noospheric autoregulation system. The object of the Rinri Project is the telepathic activation of the Circumpolar Rainbow Bridge, literally creating the long-prophesied rainbow around the Earth.

“From the point of view of the fourth-dimensional time, space is an infinitely locatable point capable of being penetrated by an infinite set of time vector potentialities, either unconsciously or consciously. The discovery of the Law of Time has made conscious the knowledge of the actual ratios governing the experience of time. Henceforth, the infinitely locatable point in space, which you embody, can now consciously coordinate different time vector potentialities—that is precisely what is meant by coordinating three to five levels of time simultaneously by practicing the Rinri Project daily. The conscious coordination of time vector potentialities, especially in conjunction with the activation of the psi bank, makes conscious the planetary telepathic field which, until now, has existed only unconsciously and in a potential daily discipline to exercise this evolutionary unfolding for all of the species.” — *Rinri Project Vol. 1: Number 2*

“For the purpose of the Rinri Project, the 260-unit Tzolkin grid is not read as a calendar, but as a time-information bearing template consisting of 260 psi chrono units. Psi chrono units are not the same as daily kin. A psi chrono unit is the equivalent of one kin, and can be considered the psi bank unit that holds the information in accord with the possibilities of that kin in all of its multidimensional applications.” — *28 Meditations on the Law of Time*

Follow the overtone chromatics in order to restabilize your own biomagnetism in tune with the Earth’s electromagnetic and geomagnetic fields of resonance.

Blue Storm-Night: Self-generating abundance chromatic  
Yellow Seed-Star: Flowering art chromatic  
Red Moon-Skywalker: Purifying prophecy chromatic  
White Wizard-Mirror: Timelessness meditation chromatic

Visualize the psi bank floating and pulsing between the two radiation belts—2,000 and 11,000 miles above the biosphere. The psi bank consists of 2080 psi chrono units (260 x 4 plates x 2 hemispheres = 2080 psi chrono units.) 520 units are activated per year. Each half-year telepathic magnetic polar activation exercise involves the simultaneous activation of 208 normal units and 52 galactic activation units of the 260 psi chrono unit matrix.

## 20 TABLETS OF THE LAW OF TIME AND THE SIXTEEN YEAR CUBE OF THE LAW

"The second stage revelation of the Telektonon, the 20 Tablets of the Law of Time focuses on the 16-Unit Cube of the Law, which is fractally expanded to encompass a sixteen-year cycle—1997-2013. While integrating the psychocosmology of the Dreamspell through processes of fractal time compression, the essence of the Sixteen-year Cube of the Law is the daily-weekly practice of cubing the codons. Since each of the 64 DNA Codons establishes a thirteen-stage permutation cycle, the sum total of 832 permutation sequences equals the same number of weeks in sixteen 52 week years ( $16 \times 52 = 13 \times 64 = 832$ ).

"Hence, the 20 tablets is a preliminary restoration of the genetic code. The 20 Tablets contain much synchronic information for experiencing what is referred to as fractal time compression, the expanded mental ability to engage in different planes or levels of time simultaneously. All of this is to establish a mind training for fully engaging the fourth-dimensional synchronic order of reality and time travel."

THE TALKING STONE OF PROPHECY

The biological information contained in the six line I Ching codons govern all of life on Earth—this means our DNA is mathematically coded as frequency structures or 6-line codons.

Codons are functions of the mathematical language of universal telepathy, known as the 64 UR runes. It is these 64 UR runes that coordinate and unlock the thirteen-unit permutation cycle of each of the 64 codons. The 64 UR runes and codons are the language of creation. These are the living keys to divine creation and self-perfection.

"The UR runes are the primal language of the cube unfolding itself."

Within the Cube of the Law each position is quartered and so organizes four UR runes/codon sequences. The first 8 cube positions (1-8) coordinate the AC Planetary Manitou, UR rune/codons 1-16, 49-64 arranged as four rune strands. The last 8 cube positions, 9-16, coordinate the CA Planetary, UR rune/codons 17-48, arranged as four rune strands.

# The Eight UR STRANDS

## *ABORIGINAL CONTINUITY (AC)*

**Rune Strand 1: Way of the Tree (Cosmic Creation)**—Tree is primal creation. Eight years to grow one cosmic tree. One cosmic tree, one garden, one cosmic race, one cosmic creation.

**Rune Strand 2: Way of Conduct**—Aboriginal way before the beginning. Conduct is the way of conforming to the Divine Plan. One way of conduct codes the aboriginal way.

**Rune Strand 7: Way of the Telepath**—This is how the aboriginal way of conduct completes itself through future knowing. Learning the way of the telepath establishes the foundation of the temple. One divine knowing, one people sharing one truth, one temple in which to join the ancient to the future way.

**Rune Strand 8: Way of the Galactic Octave**—The galactic octave is the fulfillment of time into the all-penetrating resonance of the Now. The way of the galactic octave is the conduct of art as all pervading action. One galactic octave sounding an infinitude of resonance in one perfect Now.

## *CIVILIZATIONAL ADVANCE/COSMIC AWARENESS (CA)*

**Rune Strand 3: Way of Wielding Power**—Also the way of cosmic awareness, which is the way of divine self-perfection. One way of wielding power, one people in their power, one Divine Perfection.

**Rune Strand 4: Way of the Transcendent Fourth (Cosmic Awareness)**—The refinement of Cosmic Awareness as the way of wielding power. It is the divine perfection of mind in time. One perfection of one mind, one way of the transcendent fourth to know God's mind in you.

**Rune Strand 5: Way of the Irresistible Fifth (Cosmic Order)**—This is the way of wielding power through the perfection of cosmic order. Devotion is the way to cosmic order; one cosmic order, one irresistible fifth force, one way of wielding power of divine creation.

**Rune Strand 6: Way of Dynamic Construction**—This is the way of wielding power through creative projection that brings you to the source—one source, one way of dynamic construction to build the architecture of time.

## Cosmology of The Cube

In the universal multidimensional cosmology, the Cube becomes the primary structural form that is absolutely equalized from all points of space. Any face you put it on it will be the same and equal. In the process of creation, the Cube represents the capacity for the creative process to equalize itself in all directions simultaneously. All aspects of creation are equal. In precosmic history, the human is torn by different ideologies and sectarian differences and has problems comprehending what a speck we are in the whole scheme of things. The Cube is not only the equalization of life on Earth but also in the entirety of the cosmos.

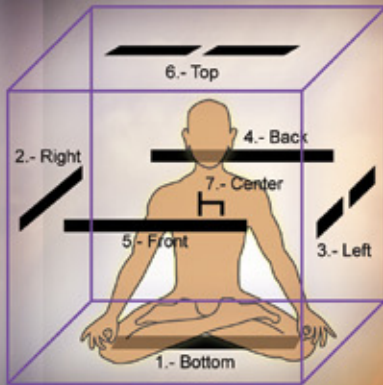

The Cube is the essence of cosmic creation—there are two primary types: Primal Cubic Parton and Heptagonon of Mind. The essence of the Cube is found in its structure with three planes projected into two sides each with 8 vertices. The 8 is the number of galactic harmony of integrity. The seven in the center of the six faces is the all-comprehending mirror—each point of the Cube is a point of meditation.

The Heptagonon of Mind is the master code of the power of divine creation—the primal creative thought moment made consciously available. It holds the mystery of the Cube in perfect form with the Seven Seals of the Seven Years of Prophecy strung on its invisible structure. The Heptagonon of Mind is the later evolved manifestation of the Primal Cubic Parton which is the original cosmic structure from which the energy and form of the universe is established.

In the synchronic code practices, we cube ourselves on the seventh day, four times a moon. We can visualize ourselves enclosed by four cubes: codon, radion, elder futhark and the (void) non-ego cube.

## 7:7::7:7

The 7:7::7:7 Telektonon Revelation is based on the program of the Telektonon 28-day cycle, the 7:7::7:7 utilizes a board with 28 daily cards. The purpose of the telepathic board game is the activation of the seven radial plasmas through four weekly sequences (7777) which work with the principle of fractal time compression for the creation of four Heptagonons of Mind—collective imaginal constructs that embody the primal principle of universal creation as a cosmic cube.

The four weekly sequences are also the field in which the cubing of the 24 Elder Futhark runes also occurs. The object: to facilitate the perfection of the human soul at the Closing of the Cycle, 2012. Along with the other fourth-dimensional tools, the 7:7::7:7 is essential, ultimately for the creation of radiosonic architecture throughout the hyperorganic, supermental phase of evolution known as the Psychozoic Era (AD 2013 + 26,000 years).

Each day meditate on the seal and recite the affirmation. Study the cards. Read and contemplate the commands and codes. Study the radial opposite card [*See pp 31-37, seven leaves of the Major Arcanum*].

The 7:7::7:7 mystery play is based on four sets of fractal time compression cycles which all relate to Mayan prophecy and Closing of the Cycle, 2012-13. The graphic illustrates the four fractal time compression cycles which code the 13 Moon calendar, along with the corresponding moon values.

## Physics of the Cube of the Law

Note that the first three plasmas every week create one sensory quantum. A sensory quantum is the building block of making something real in your imagination. The fourth plasma every week is for catalyzing the first three and the last three plasmas into a time atom. (A telepathic time atom is the imaginal construct for creation of your vehicle of time travel).

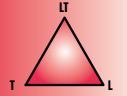

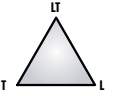

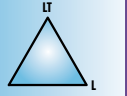

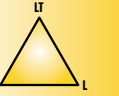

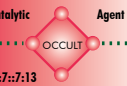

The last three plasmas every week create one telepathic quantum. One telepathic quantum joined by the catalytic plasma to one sensory quantum is what makes one time atom. Four time atoms per 28-day moon are stored at the center of the Earth as one Master Time Molecule. The sensory quantum constructs, the telepathic quantum propels.

Note: On days 7, 14, 21, 28: Perform the codon cube meditation. Cube the codon. Visualize your radion/Heptagonon of Mind cube around your codon cube, like a glove over a hand. Then place the week's telepathic time atom vertically within the cube; from the central point where the time atom, Silio seal and weekly UR Rune meet, discharge and radiate love, wisdom and healing.

# MOONLY MEDITATION ON Day 28

This meditation is done every 28th day of the moon, 13 times a year. For this meditation we will use the example of the first moon of the Magnetic Moon year, Yellow Lunar Warrior, Kin 236. Warrior is in the Cardinal Earth Family located in the throat chakra.

Imagine a flower with four colored petals (red, white, blue, yellow) at the throat chakra. Focus on the yellow petal, it is facing outward. Now connect this chakra with the Planet Holon (Warrior) and pulse this region, which covers the North Atlantic Ocean. Hold this visualization and through the yellow petal, if you live north of the equator, send a red magnet from your throat chakra to the South Pole; if you live south the equator then receive a red magnet in the yellow petal of your throat chakra from the North. (All the red magnets that the Northern teams are transmitting first go to the center of the Earth where they reach the great Invisible Magnet of Be-ness.)

Hold this visualization, but now add the psi bank plate overhead (northern and southern hemispheres). Locate the Yellow Lunar Warrior first on the four northern plates. Now visualize its occult, *Red Crystal Serpent*, on the four southern plates. Pulse these points. Now visualize the Yellow Lunar Warriors and the Red Crystal Serpents on the four reverse southern plates. Hold this pulse and pulse all points. Now locate on the psi bank plate today's psi chrono unit Yellow Cosmic Sun, Kin 260, this is a Galactic Activation Portal. Pulse this point and also see its symmetrically opposite place in the southern hemisphere. So we have today's kin, occult and psi chrono pulsing overhead on the psi bank plates, we have our chakra system hooked up with the planet holon and we have sent (or received) the red magnet.

Now place yourself in the codon cube. For example if the weekly codon is 27, Temple of Being, cube yourself with a yang line on the bottom, then yin on the right, left, back and front and a yang on the top. Now you have the cube codon constructed and you are sitting at the center. Now take the UR Rune which corresponds to the 13 weeks, place this brilliantly colored orange codon in the middle of the codon cube in your heart center. Hold this for a few moments and visualize orange rays of light streaming from the UR rune and extending all directions hitting all six sides of the cube so that they have activated that particular codon.

 yin ——— 5.front  
 yin ——— 4.back  
 yin ——— 3.left  
 yin ——— 2.right  
 yang ——— 1.bottom

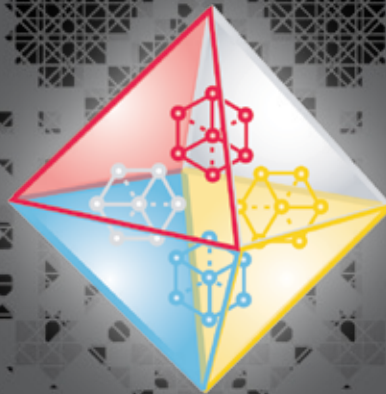

CODON 27, TEMPLE OF BEING

Once they have activated that particular codon, they are sending out streams of light and energy; blue colored healing energy with that particular codon and wherever that codon exists in whatever life forms—plants, animals or human—that life form is receiving healing rays wherever it may be found. Keep visualizing from your heart center, countless streams of light and energy coming out from the UR rune illuminating and making that particular codon feel vibrant, wherever it exists in whatever forms of life on this planet. Hold this meditation.

Now place the radion cube around this cube—visualize on the top the yellow Dali seal, on the bottom is the red Seli seal, on the front is the white Gamma seal, on the back is the blue Kali seal, on the right is the yellow Alpha seal, on the left is the red Limi seal. Imagine this radion cube fits perfectly around the codon cube and then in the very center is the UR rune and the white Silio seal and that is also interpenetrating with the UR rune so the light is also emanating out from the white Silio seal. Send out white healing light. Now visualize the yellow unified field time atom within the doubled cubes, extending from the top to the bottom of the cube interpenetrating through your heart chakra. Feel the glowing, luminous yellow time atom. Feel the white Silio in your heart and say: “My role is to accomplish the actions of the Buddha, I discharge the mental electron neutron at the center of the Earth.”

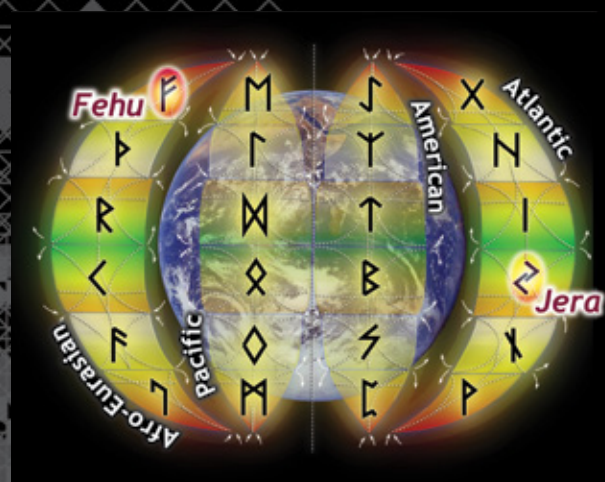

So we now have ourselves within the codon cube, the radion cube, and the glowing, luminous yellow unified time atom. And because it is the fourth week of the moon we also place around us the yellow and the blue tetrahedron. The tetrahedron has two yellow triangular faces and two blue triangular faces. Imagine this large tetrahedron enclosing the radion cube. Feel this vibrating.

Now go to the center of the Earth in your tetrahedron, where you will find a large octahedron. The tetrahedron that was enclosing your cube now joins with the other tetrahedron (that you built during the first two weeks) that has on top two red faces and two white faces. Now it has two blue and two yellow faces on the bottom. Within the center of the octahedron, place the time atoms you have built this moon. The Red Analog time atom has its axis aligned with the polar axis that goes through the center of the octahedron to the North Pole. This time atom is turning clockwise. Below at the South Pole is the Blue Occult time atom. The red and blue hold the polar axis of the Earth in place. The blue time atom is turning in a counterclockwise direction. Visualize the White Antipode time atom extending to the right from the center of the octahedron. The white time atom is rotating perpendicular to the polar time atoms. It holds the gravitation axis; together with the Yellow Unified Field time atom to the left. So the white and yellow time atoms are rotating around holding the gravitational balance of the octahedron and of the Earth.

## MOONLY MEDITATION ON Day 28

Now visualize the Elder Futhark runes around the Earth's tympanum around your cube. Begin in the left Afro-Eurasian Plate with Fehu at the top, ending with the Jera rune, south of the equator, Atlantic Plate. Once these are in place, bring your awareness back to the very center point of the octahedron. Now dissolve your cube, time atom and yourself so that all the elements of the cube and meditation are brought into one luminous point of light at the center of the octahedron (heart center).

From this center point, visualize infinite amounts of light plasmic energy that are scintillating and shooting above and below the polar axis. These streams of luminous plasmic energy are then coordinated and emanated from the heart center going out the North and South poles until they reach the surface of the Earth and connect with the aurora borealis in the North and the aurora australis in the South connected by a red and blue intertwined double helix. This creates the Circumpolar Rainbow Bridge, which has two parts: the day alternator (which faces the sun) and the night alternator (which faces the galaxy or the galactic center) so the streams of cosmic energy coming up from the North and South pole reach the inner magnetic field, creating the two parts of the rainbow bridge, with the Earth inside of them like a giant gyroscope. Hold this visualization and say to yourself: "Now I embody the power of magnetic accomplishment sealed by the power of lunar elegance."

Now take the entire visualization and place it in your heart center. Then dissolve it all into light; extend this light to all sentient beings, to all living forms, that they can be included in this great vision and the Great Divine Plan that is unfolding through us.

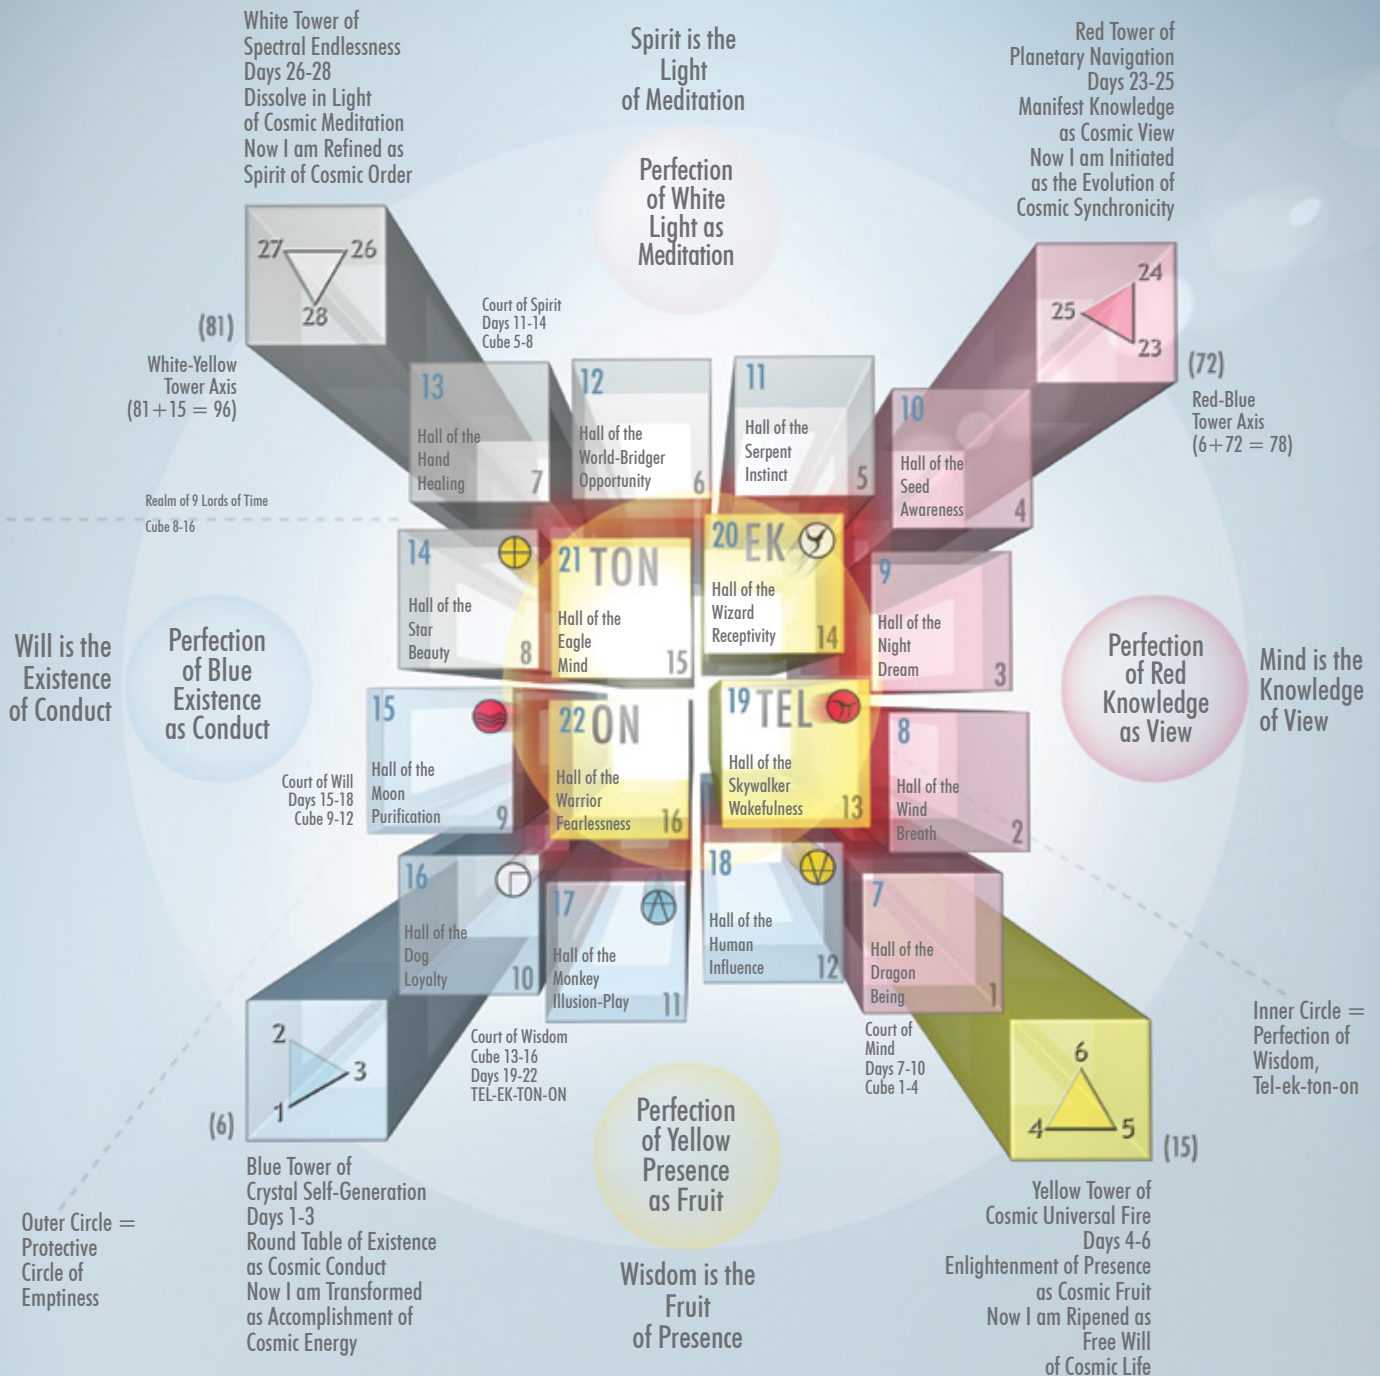

## *28-Day Cosmology*

The 28-day cycle is the galactic harmonic standard. It is an infinitely repeatable frequency based on the primary formulation 4:7 (:7:13). 28 codes the menstruation cycle, the mean lunar cycle, 28 days to rotate around Earth, and the solar equatorial cycle—28 days to turn on its axis. For this reason, it is the perfect cycle for re-establishing a spiritually normative frequency in the collective mind (noosphere) of the new evolving species, of biosolar telepaths—homo noosphericus. Herein are presented four sets of codes.

- 1. TELEKTONON OF THE STARBORN ELDERS*
- 2. IBN AL-ARABI'S COSMIC LANGUAGE*

## TELEKTONON-TOLLAN OF THE STAR BORN ELDERS, PRACTICE INSTRUCTIONS

28-day cycle for the construction of the Cosmic Palace of Mental-Spiritual Enlightenment: Four Matrix Towers and the Cube Temple of four Courts, each Court with four Halls each for the cultivation of the four powers of enlightenment: View, Meditation, Conduct and Wisdom. This method of mental self-cultivation is the basis for the construction of Cosmic Civilization, Tollan of the Starborn Elders on Earth. It should be studied in conjunction with your meditation practice, and as an overlay to the existing practices of the Telektonon, Game of Prophecy, 7:7::7:7, 20 Tablets of the Law of Time, Mystery of the Stone, etc.

Note: there are two Matrix Towers of Earth, Blue Crystal Self-Generation (Kin 259) and Yellow Cosmic Universal Fire (Kin 260) and two Matrix Towers of Heaven, Red Planetary Navigation (Kin 257) and White Spectral Endlessness (Kin 258). These are the four kin of Harmonic 65, Cosmic Matrix. They are the master coordinating Kin. Three days are spent in each tower. The first two coordinate Existence and Presence, preparing you for the Cube Journey. The second two coordinate Knowledge and Light, the fulfillment of spiritual power.

## Enter into the Matrix Towers of Earth:

**Blue Matrix Tower of Crystal Self Generation (Kin 259). Call Round Table of the Four Bodies (Tetrakaya) - your own Body, Speech, Mind and Soul. Contemplate: Speech is to Body as Mind is to Soul.**

Day 1. Activate your round table. Identify your four "bodies."  
Day 2. Transform your round table, create interaction with your four bodies.  
Day 3. Embody the synchronized unification of your four bodies as Conduct of Cosmic Existence. Proclaim, "Now I am Transformed as Accomplishment of Cosmic Energy."

## Now you are empowered to pass on to:

**Yellow Matrix Tower of Cosmic Universal Fire (Kin 260). Cultivate your will to enlightenment. Contemplate: The Enlightened nature already exists within me.**

**Exit in Joy and Serenity, for another 28-day cycle.**

# Ibn al-Arabi's Cosmic Language

## A 28-DAY TELEKTONON PROGRAM

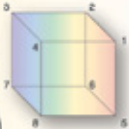

Ibn al-Arabi classified the 28 letters of the Arabian Alphabet as a cosmology known as the cosmic language of the breath of the All-Merciful. These 28 stages are "written" in or known about through the Three Books of God—the cosmos, the self, and the Qur'an, the last being the key that opens the other two "books." The 28 stages correspond to the comprehension of the 28 day circuit as a totality in accord with the Law of Time. Being a function of the ratio 4:7::7:13, the 28 stages also unfold as Seven Stages. Hence these 28 stages of the Breath of the All-Merciful can be used as daily points of cosmological meditation enriching the play of the daily Telektonon, an opening to the fulfillment of UR, the Universal Religion on Earth.

# Self-Liberation through Seeing with Naked Awareness

This is the most complete exposition on the meaning and nature of reality experienced through Dzogchen (natural mind) meditation practice

**1.** Here is contained "Self-Liberation through Seeing with Naked Awareness," this being a Direct Introduction to the State of Intrinsic Awareness,

From "The Profound Teaching of Self-Liberation in the Primordial State of the Peaceful and Wrathful Deities."

**2.** Homage to the Trikaya and to the Deities who represent the inherent luminous clarity of intrinsic awareness.

**3.** Herein I shall teach "Self-Liberation through Seeing with Naked Awareness," which is a direct introduction to intrinsic awareness

From "The Profound Teaching of Self-Liberation in the Primordial State of the Peaceful and Wrathful Deities."

Truly, this introduction to your own intrinsic awareness

Should be contemplated well, O fortunate sons of a noble family!

SAMAYA gya gya gya

**4.** Emaho!

It is the single (nature of) mind which encompasses all of Samsara and Nirvana.

Even though its inherent nature has existed from the very beginning, you have not recognized it;

Even though its clarity and presence has been uninterrupted, you have not yet encountered its face.

Even though its arising has nowhere been obstructed, still you have not comprehended it.

Therefore, this (direct introduction) is for the purpose of bringing you to self-recognition.

Everything that is expounded by the Victorious Ones of the three times

In the eighty-four thousand Gateways to the Dharma.

Is incomprehensible (unless you understand intrinsic awareness).

Indeed, the Victorious Ones do not teach anything other than the understanding of this.

Even though there exist unlimited numbers of scriptures, equal in their extent to the sky,

Yet with respect to the real meaning, there are three statements that will introduce you to your own intrinsic awareness.

This introduction to the manifest Primordial State of the Victorious One

Is disclosed by the following method for entering into the practice where there exists no antecedent nor subsequent practices.

**5.** Kye-ho!

O my fortunate sons, listen!

Even though that which is usually called "mind" is widely esteemed and much discussed,

Still it is not understood or it is wrongly understood or it is understood in a one-sided manner only.

Since it is not understood correctly just as it is in itself,

There come into existence inconceivable numbers of philosophical ideas and assertions.

Furthermore, since ordinary individuals do not understand it,

They do not recognize their own nature,

And so they continue to wander among the six destinies (of rebirth) within the three worlds and thus experience suffering.

Therefore, not understanding your own mind is a very grievous fault.

Even though the Sravakas and the Pratyekabuddhas wish to understand it in terms of the Anatman doctrine,

Still they do not understand it as it is in itself.

Also there exist others who, being attached to their own personal ideas and interpretations,

Become fettered by these attachments and so do not perceive the Clear Light.

The Sravakas and the Pratyekabuddhas are (mentally) obscured by their attachments to subject and object.

The Madhyamikas are (mentally) obscured by their attachments to the extremes of the Two Truths.

The practitioners of the Kriya Tantra and the Yoga Tantra are (mentally) obscured by their attachments to seva-sadhana practice.

The practitioners of the Mahayoga and the Anuyoga are (mentally) obscured by their attachments to Space and Awareness.

And with respect to the real meaning of nonduality, since they divide these (Space and Awareness) into two, they fall into deviation.

If these two do not become one without any duality, you will certainly not attain Buddhahood.

In terms of your own mind, as is the case with everyone, Samsara and Nirvana are inseparable.

Nonetheless, because you persist in accepting and enduring attachments and aversions, you will continue to wander in Samsara.

Therefore, your active dharmas and your inactive ones both should be abandoned.

However, since self-liberation through seeing nakedly by means of intrinsic awareness is here revealed to you,

You should understand that all dharmas can be perfected and completed in the great total Self-Liberation.

And therefore, whatever (practice you do) can be brought to perfection within the Great Perfection.

SAMAYA gya gya gya

 **6.** As for this sparkling awareness which is called "mind,"

Even though one says that it exists, it does not actually exist.

(On the other hand) as a source, it is the origin of the diversity of all the bliss of Nirvana and all of the sorrow of Samsara.

And as for its being something desirable, it is cherished alike in the Eleven Vehicles.

With respect to its having a name, the various names that are applied to it are inconceivable (in their numbers).

Some call it "the nature of the mind" or "mind itself."

Some Tirthikas call it by the name Atman or "the Self."

The Sravakas call it the doctrine of Anatman or "the absence of a self."

The Chittamatrins call it by the name Chitta or "the Mind."

Some call it the Prajnaparamita or "the Perfection of Wisdom."

Some call it the name Tathagatagarbha or "the embryo of Buddhahood."

Some call it by the name Mahamudra or "the Great Symbol."

Some call it by the name "the Unique Sphere."

Some call it by the name Dharmadhatu or "the dimension of Reality."

Some call it by the name Alaya or "the basis of everything."

And some simply call it by the name "ordinary awareness."

 **7.** Now, when you are introduced (to your own intrinsic awareness), the method for entering into it involves three considerations:

Thoughts in the past are clear and empty and leave no traces behind.

Thoughts in the future are fresh and unconditioned by anything.

And in the present moment, when (your mind) remains in its own condition without constructing anything,

awareness, at that moment, in itself is quite ordinary.

And when you look into yourself in this way nakedly (without any discursive thoughts),

Since there is only this pure observing, there will be found a lucid clarity without anyone being there who is the observer;

only a naked manifest awareness is present.

(This awareness) is empty and immaculately pure, not being created by anything whatsoever.

It is authentic and unadulterated, without any duality of clarity and emptiness.

It is not permanent and yet it is not created by anything.

However, it is not a mere nothingness or something annihilated because it is lucid and present.

It does not exist as a single entity because it is present and clear in terms of being many.

(On the other hand) it is not created as a multiplicity of things because it is inseparable and of a single flavor.

This inherent self-awareness does not derive from anything outside itself.

This is the real introduction to the actual condition of things.

 **8.** Within this (intrinsic awareness), the Trikaya are inseparable and fully present as one.

Since it is empty and not created anywhere whatsoever, it is The Dharmakaya.

Since its luminous clarity represents the inherent transparent radiance of emptiness, it is the Sambhogakaya.

Since its arising is nowhere obstructed or interrupted, it is the Nirmanakaya.

These three (the Trikaya) being complete and fully present as one, are its very essence.

 **9.** When you are introduced in this way through this exceedingly powerful method for entering into the practice,

(You discover directly) that your own immediate self-awareness is just this (and nothing else),

And that it has an inherent self-clarity which is entirely unfabricated.

How can you then speak of not understanding the nature of the mind?

Moreover, since you are meditating without finding anything there to meditate upon,

How can you say that your meditation does not go well?

Since your own manifest intrinsic awareness is just this,

How can you say that you cannot find your own mind?

The mind is just that which is thinking:

And yet, although you have searched (for the thinker), how can you say that you do not find him?

With respect to this, nowhere does there exist the one who is the cause of (mental) activity.

And yet, since activity exists, how can you say that such activity does not arise?

Since merely allowing (thoughts) to settle into their own condition, without trying to modify them in any way, is sufficient,

How can you say that you are not able to remain in a calm state?

Since allowing (thoughts) to be just as they are, without trying to do anything about them, is sufficient,

How can you say that you are not able to do anything with regard to them?

Since clarity, awareness, and emptiness are inseparable and are spontaneously self-perfected,

How can you say that nothing is accomplished by your practice?

Since (intrinsic awareness) is self-originated and spontaneously self-perfected without any antecedent causes or conditions,

How can you say that you are not able to accomplish anything by your efforts?

Since the arising of discursive thoughts and their being liberated occur simultaneously,

How can you say that you are unable to apply an antidote?

Since your own immediate awareness is just this,

How can you say that you do not know anything with regard to it?

 **10.** It is certain that the nature of the mind is empty and without any foundation whatsoever.

Your own mind is insubstantial like the empty sky.

You should look at your own mind to see whether it is like that or not.

Being without any view that decisively decides that it is empty,

It is certain that self-originated primal awareness has been clear (and luminous) from the very beginning,

Like the heart of the sun, which is itself self-originated.

You should look at your own mind to see whether it is like that or not.

It is certain that this primal awareness or gnosis, which is one's intrinsic awareness, is unceasing,

Like the main channel of a river that flows unceasingly.

You should look at your own mind to see whether it is like that or not.

It is certain that the diversity of movements (arising in the mind) are not apprehendable by memories,

They are like insubstantial breezes that move through the atmosphere.

You should look at your own mind to see whether it is like that or not.

It is certain that whatever appearances occur, all of them are self-manifested,

Like the images in a mirror being self-manifestations that simply appear.

You should look at your own mind to see whether it is like that or not.

It is certain that all of the diverse characteristics of things are liberated into their own condition,

Like clouds in the atmosphere that are self-originated and self-liberated.

You should look at your own mind to see whether it is like that or not.

 **11.** There exist no phenomena other than what arises from the mind.

Other than the meditation that occurs, where is the one who is meditating?

There exist no phenomena other than what arises from the mind.

Other than the behavior that occurs, where is the one who is behaving?

There exist no phenomena other than what arises from the mind.

Other than the samaya vow that occurs, where is the one who is guarding it?

There exist no phenomena other than what arises from the mind.

Other than the fruition that occurs, where is the one who is realizing (the fruit)?

You should look at your own mind, observing it again and again.

 **12.** When you look upward into the space of the sky outside yourself,

If there are no thoughts occurring that are emanations being projected,

And when you look inward at your own mind inside yourself,

If there exists no projectionist who projects thoughts by thinking them,

Then your own subtle mind will become lucidly clear without anything being projected.

Since the Clear Light of your own intrinsic awareness is empty, it is the Dharmakaya,

And this is like the sun rising in a cloudless illuminated sky.

Even though (this light cannot be said) to possess a particular shape or form, nevertheless, it can be fully known.

The meaning of this, whether or not it is understood, is especially significant.

 **13.** This self-originated Clear Light, which from the very beginning was in no way produced (by something antecedent to it),

Is the child of awareness, and yet it is itself without any parents--amazing!

This self-originated primordial awareness has not been created by anything--amazing!

It does not experience birth nor does there exist a cause for its death--amazing!

Although it is evidently visible, yet there is no one there who sees it--amazing!

Although it has wandered throughout Samsara, it has come to no harm--amazing!

Even though it has seen Buddhahood itself, it has not come to any benefit from this--amazing!

Even though it exists in everyone everywhere, yet it has gone unrecognized--amazing!

Nonetheless you hope to attain some other fruit than this elsewhere--amazing!

Even though it exists within yourself (and nowhere else), yet you seek for it elsewhere--amazing!

 **14.** How wonderful!

This immediate intrinsic awareness is insubstantial and lucidly clear:

Just this is the highest pinnacle of all views.

It is all-encompassing, free of everything, and without any conceptions whatsoever:

Just this is the highest pinnacle among all meditations.

It is unfabricated and inexpressible in worldly terms:

Just this is the highest pinnacle among all courses of conduct.

Without being sought after, it is spontaneously self-perfected from the very beginning:

Just this is the highest pinnacle among all fruits.

 **15.** Here is the teaching of the four great vehicles that are without error:

(First) there is the great vehicle of the unmistaken view.

Since this immediate awareness is lucidly clear,

And this lucid clarity is without error or mistake, it is called "a vehicle."

(Second) there is the great vehicle of the unmistaken meditation.

Since this immediate awareness is that which possesses clarity,

And this lucid clarity is without error or mistake, it is called "a vehicle."

(Third) there is the great vehicle of the unmistaken conduct.

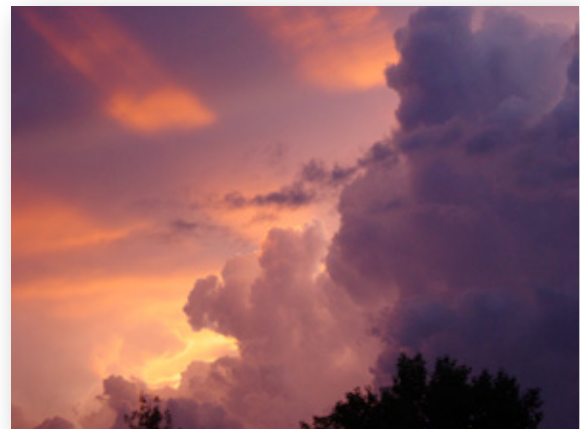

Since this immediate primal awareness is that which possesses clarity,

And this lucid clarity is without error or mistake, it is called "a vehicle".

(Fourth) there is the great vehicle of the unmistaken fruit.

Since this immediate awareness is lucidly clear,

And this lucid clarity is without error or mistake, it is called "a vehicle."

 **16.** Here is the teaching on the four great unchanging (essential points called) "nails."

(First) there is the great nail of the unchanging view:

This immediate present awareness is lucidly clear,

Because it is stable in the three times, it is called "a nail."

(Second) there is the great nail of the unchanging meditation:

This immediate present awareness is lucidly clear,

Because it is stable in the three times, it is called "a nail."

(Third) there is the great nail of the unchanging conduct:

This immediate present awareness is lucidly clear,

Because it is stable in the three times, it is called "a nail."

(Fourth) there is the great nail of the unchanging fruit:

This immediate present awareness is lucidly clear,

Because it is stable in the three times, it is called "a nail."

 **17.** Then, as for the secret instruction which teaches that the three times are one:

You should relinquish all notions of the past and abandon all precedents.

You should cut off all plans and expectations with respect to the future.

And in the present, you should not grasp (at thoughts that arise) but allow (the mind) to remain in a state like the sky.

Since there is nothing upon which to meditate (while in the primordial state), there is no need to meditate.

And since there does not exist any distraction here, you continue in this state of stable mindfulness without distraction.

In this state which is without meditation and without any distraction, you observe everything with a naked (awareness).

Your own awareness is inherently knowing, inherently clear, and luminously brilliant.

When it arises, it is called the Bodhichitta, "the enlightened mind".

Being without any activity of meditation, it transcends all objects of knowledge.

Being without any distraction, it is the luminous clarity of the Essence itself.

Appearances, being empty in themselves, become self-liberated; clarity and emptiness (being inseparable) are the Dharmakaya.

Since it becomes evident that there is nothing to be realized by means of the path to Buddhahood,

At this time you will actually behold Vajrasattva.

 **18.** Then, as for the instruction for exhausting the six extremes and overthrowing them:

Even though there exist a great many different views that do not agree among themselves,

This "mind" which is your own intrinsic awareness is in fact self-originated primal awareness.

And with regard to this, the observer and the process of observing are not two (different things).

When you look and observe, seeking the one who is looking and observing,

Since you search for this observer and do not find him,

At that time your view is exhausted and overthrown.

Thus, even though it is the end of your view, this is the beginning with respect to yourself.

The view and the one who is viewing are not found to exist anywhere.

Without its falling excessively into emptiness and non-existence even at the beginning,

At this very moment your own present awareness becomes lucidly clear.

Just this is the view (or the way of seeing) of the Great Perfection.

(Therefore) understanding and not understanding are not two (different things).

 **19.** Although there exist a great many different meditations that do not agree among themselves,

Your own ordinary present awareness is directly penetrating.

The process of meditation and the one who meditates are not two (different things).

When you look for the meditator who is meditating or not meditating,

Since you have searched for this meditator and have not found him anywhere,

At that time your meditation is exhausted and overthrown.

Thus, even though it is the end of your meditation, this is the beginning with respect to yourself.

The meditation and the meditator are not found to exist anywhere.

Without its falling under the power of delusion, drowsiness, or agitation,

Your immediate unfabricated awareness becomes lucidly clear;

And this unmodified state of even contemplation is concentration.

(Therefore) remaining in a calm state or not remaining in it are not two (different things).

 **20.** Although there exist a great many different kinds of behavior which do not agree among themselves,

Your own self-originated primal awareness is the Unique Sphere.

Behavior and the one who behaves are not two (different things).

When you look for the one it is who behaves with action or without action,

Since you have searched for the one who acts and have not found him anywhere,

At that time your behavior is exhausted and overthrown.

Thus, even though it is the end of your conduct and behavior, this is the beginning with respect to yourself.

From the very beginning neither behavior nor the one who behaves have existed (as separate realities).

Without its falling under the power of errors and inherited predispositions,

Your immediate awareness is an unfabricated inherent clarity.

Without accepting or rejecting anything, just letting things be as they are without trying to modify them,

Such conduct or behavior alone is pure.

(Therefore) pure and impure action are not two (different things).

 **21.** Although there exist great many different fruits that do not agree among themselves,

The nature of the mind that is inherent awareness is (none other than) the spontaneously perfected Trikaya.

What is realized and the one who realizes it are not two (different things).

When you look for the fruit and for the one who has realized it,

Since you have searched for the realizer (of the fruit) and have not found him anywhere,

At that time your fruit is exhausted and overthrown.

Thus, even though it is an end to your fruition, still this is the beginning with respect to yourself.

Both the fruition and the one who has attained the realization are found to not exist anywhere.

Without its falling under the power of attachments or aversions or of hopes and fears,

Your immediate present awareness becomes spontaneously perfected inherent clarity.

Understand that within yourself the Trikaya is fully manifest.

(Therefore) this itself is the fruition of primordial Buddhahood.

 **22.** This intrinsic awareness is free of the eight extremes, such as eternalism and nihilism, and the rest.

Thus we speak of the Middle Way where one does not fall into any of the extremes,

And we speak of intrinsic awareness as uninterrupted mindful presence.

Since emptiness possesses a heart that is intrinsic awareness,

Therefore it is called by the name of Tathagatagarbha, that is, "the embryo or heart of Buddhahood."

If you understand the meaning of this, then that will transcend and surpass everything else.

Therefore, it is called by the name of Prajnaparamita, that is, "the Perfection of Wisdom."

Because it cannot be conceived of by the intellect and is free of all (conceptual) limitations from the very beginning,

Therefore it is called by the name of Mahamudra, that is, "the Great Symbol."

Because of that, in accordance with whether it is specifically understood or not understood,

Since it is the basis of everything, of all the bliss of Nirvana and of all the sorrow of Samsara,

Therefore it is called by the name of Alaya, that is, "the foundation of everything."

Because, when it remains in its own space, it is quite ordinary and in no way exceptional,

This awareness that is present and lucidly clear

Is called by the name of "ordinary awareness."

However many names may be applied to it, even though they are well conceived and fancy sounding,

With regard to its real meaning, it is just this immediate present awareness (and nothing else).

 **23.** To desire something other than this

Is just like having an elephant (at home), but searching for its tracks elsewhere.

Even though you may try to measure the universe with a tape measure, it will not be possible to encompass all of it.

(Similarly) if you do not understand that everything derives from the mind, it will not be possible for you to attain Buddhahood.

By not recognizing this (intrinsic awareness for what it is), you will then search for your mind somewhere outside of yourself.

If you seek for yourself elsewhere (outside of yourself), how can you ever find yourself?

For example, this is just like an idiot who, going into a crowd of many people,

And having let himself become confused because of the spectacle,

Does not recognize himself; and, even though he searches for himself everywhere,

He continually makes the error of mistaking others for himself.

(Similarly) since you do not see the natural condition of the real disposition of things,

You do not know that appearances come from mind, and so you are thrust once again into Samsara.

By not seeing that your own mind is actually the Buddha, Nirvana becomes obscured.

With respect to Samsara and Nirvana, (the difference is simply due) to ignorance or to awareness respectively.

But at this single instant (of pure awareness), there is in fact no actual difference between them (in terms of their essence).

If you come to perceive them as existing somewhere other than in your own mind, this is surely an error.

(Therefore) error and non-error are actually of a single essence (which is the nature of the mind).

Since the mind-streams of sentient beings are not made into something that is divided into two,

The unmodified uncorrected nature of the mind is liberated by its being allowed simply to remain in its own (original) natural condition.

If you are not aware that the fundamental error or delusion comes from the mind,

You will not properly understand the real meaning of the Dharmata (the nature of reality);

 **24.** You should look into what is self-arising and self-originated.

With respect to these appearances, in the beginning they must arise from somewhere,

In between they must remain somewhere, and at the end they must go somewhere.

Yet when you look (into this matter), it is, for example, like a crow gazing into a well.

When he flies away from the well, (his reflection) also departs from the well and does not return.

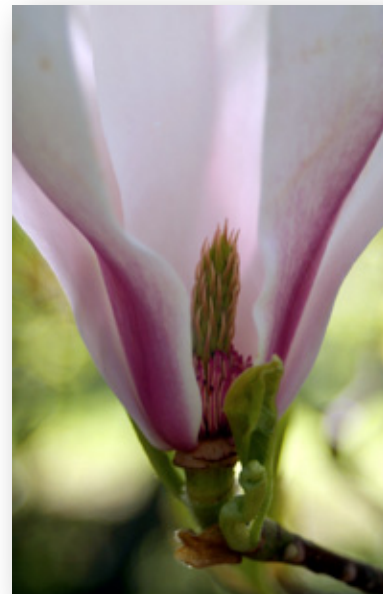

In the same way, appearances arise from the mind;

They arise from the mind and are liberated into the mind.

The nature of the mind which (has the capacity) to know everything and be aware of everything is empty and clear;

As is the case with the sky above, its emptiness and its clarity have been inseparable from the very beginning.

Self-originated primal awareness becomes manifest,

And becoming systematically established as luminous clarity, just this is the Dharmata, the nature of reality.

Even though the indication of its existence is all phenomenal existence (which manifests externally to you),

You are aware of it in your own mind, and this latter is the nature of the mind.

Since it is aware and clear, it is understood to be like the sky.

However, even though we employ the example of the sky to indicate the nature of the mind,

This is in fact only a metaphor or simile indicating things in a one-sided fashion.

The nature of the mind, as well as being empty, is also intrinsically aware; everywhere it is clear.

But the sky is without any awareness; it is empty as an inanimate corpse is empty.

Therefore, the real meaning of "mind" is not indicated by the sky.

So without distraction, simply allow (the mind) to remain in the state of being just as it is.

 **25.** Moreover, as for this diversity of appearances, which represents relative truth,

Not even one of these appearances is actually created in reality, and so accordingly they disappear again.

All things, all phenomenal existence, everything within Samsara and Nirvana,

Are merely appearances (or phenomena) which are perceived by the individual's single nature of the mind.

On any particular occasion, when your own (internal) mind-stream undergoes changes,

Then there will arise appearances which you will perceive as external changes.

Therefore, everything that you see is a manifestation of mind.

And, moreover, all of the beings inhabiting the six realms of rebirth perceive everything with their own distinct karmic vision.

 **26.** The Tirthikas who are outsiders see all this in terms of the dualism of eternalism as against nihilism.

Each of the nine successive vehicles sees things in terms of its own view.

Thus, things are perceived in various different ways and may be elucidated in various different ways.

Because you grasped at these various (appearances that arise), becoming attached to them, errors have come into existence.

Yet with respect to all of these appearances of which you are aware in your mind,

Even though these appearances that you perceive do arise, if you do not grasp at them, then that is Buddhahood.

Appearances are not erroneous in themselves, but because of your grasping at them, errors come into existence.

But if you know that these thoughts only grasp at things which are mind, then they will be liberated by themselves.

Everything that appears is but a manifestation of mind.

Even though the entire external inanimate universe appears to you, it is but a manifestation of mind.

Even though all of the sentient beings of the six realms appear to you they are but a manifestation of mind.

Even though the happiness of humans and the delights of the Devas in heaven appear to you, they are but manifestations of mind.

Even though the sorrows of the three evil destinies appear to you, they are but manifestations of mind.

Even though the five poisons representing ignorance and the passions appear to you, they are but manifestations of mind.

Even though intrinsic awareness which is self-originated primal awareness appears to you, it is but a manifestation of mind.

Even though good thoughts along the way to Nirvana appear to you, they are but manifestations of mind.

Even though obstacles due to demons and evil spirits appear to you, they are but manifestations of mind.

Even though the gods and other excellent attainments appear to you, they are but manifestations of mind.

Even though various kinds of purity appear to you, they are but manifestations of mind.

Even though (the experience) of remaining in a state of one-pointed concentration without any discursive thoughts appears to you, it is but a manifestation of mind.

Even though the colors that are the characteristics of things appear to you, they are but manifestations of mind.

Even though a state without characteristics and without conceptual elaborations appears to you, it is but a manifestation of mind.

Even though the nonduality of the one and the many appears to you, it is but a manifestation of mind.

Even though existence and non-existence which are not created anywhere appear to you, they are but manifestations of mind.

There exist no appearances whatsoever that can be understood as not coming from mind.

 **27.** Because of the unobstructed nature of the mind, there is a continuous arising of appearances.

Like the waves and the waters of the ocean, which are not two (different things),

Whatever arises is liberated into the natural state of the mind.

However many different names are applied to it in this unceasing process of naming things,

With respect to its real meaning, the mind (of the individual) does not exist other than as one.

And, moreover, this singularity is without any foundation and devoid of any root.

But, even though it is one, you cannot look for it in any particular direction.

It cannot be seen as an entity located somewhere, because it is not created or made by anything.

Nor can it be seen as just being empty, because there exists the transparent radiance of its own luminous clarity and awareness.

Nor can it be seen as diversified, because emptiness and clarity are inseparable.

Immediate self-awareness is clear and present.

Even though activities exist, there is no awareness of an agent who is the actor.

Even though they are without any inherent nature, experiences are actually experienced.

If you practice in this way, then everything will be liberated.

With respect to your own sense faculties, everything will be understood immediately without any intervening operations of the intellect.

Just as is the case with the sesame seed being the cause of the oil and the milk being the cause of butter,

But where the oil is not obtained without pressing and the butter is not obtained without churning,

So all sentient beings, even though they possess the actual essence of Buddhahood,

Will not realize Buddhahood without engaging in practice.

If he practices, then even a cowherd can realize liberation.

Even though he does not know the explanation, he can systematically establish himself in the experience of it.

(For example) when one has had the experience of actually tasting sugar in one's own mouth,

One does not need to have that taste explained by someone else.

Not understanding this (intrinsic awareness), even Panditas can fall into error.

Even though they are exceedingly learned and knowledgeable in explaining the nine vehicles,

It will only be like spreading rumors of places which they have not seen personally.

And with respect to Buddhahood, they will not even approach it for a moment.

If you understand (intrinsic awareness), all of your merits and sins will be liberated into their own condition.

But if you do not understand it, any virtuous or vicious deeds that you commit

Will accumulate as karma leading to transmigration in heavenly rebirth or to rebirth in the evil destinies respectively.

But if you understand this empty primal awareness which is your own mind,

The consequences of merit and of sin will never come to be realized,

Just as a spring cannot originate in the empty sky.

In the state of emptiness itself, the object of merit or of sin is not even created.

Therefore, your own manifest self-awareness comes to see everything nakedly.

This self-liberation through seeing with naked awareness is of such great profundity,

And, this being so, you should become intimately acquainted with self-awareness.

Profoundly sealed!

## 28. How wonderful!

As for this "Self-Liberation through Seeing with Naked Awareness" which is a direct introduction to one's own intrinsic awareness,

It is for the benefit of those sentient beings belonging to the later generations of those future degenerate times

That all of my Tantras, Agamas, and Upadesas,

Though necessarily brief and concise, have been composed.

And even though I have disseminated them at the present time, yet they shall be concealed as precious treasures,

So that those whose good karma ripens in the future shall come to encounter them.

SAMAYA      gya gya gya

This treatise which is an introduction to one's actual intrinsic awareness or state of immediate presence

Is entitled "Self-Liberation through Seeing with Naked Awareness."

It was composed by Padmasambhava, the Master from Uddiyana.

Until Samsara is emptied of living beings, may this Great Work of liberating them not be abandoned!

## Mystery of the Stone

The Mystery of the Stone is the second seven-year telepathic experiment to be conducted 2004-2011, where the seven dimensions of Heaven are established consciously in the Earth, creating a perfect field of resonance between the Cube of Heaven and the Cube of Earth. Through weekly cubic exercises, Earth Wizards (overseen by the first seven Lords of Time) will create the second Heptagonon of Mind at the center of the Earth around the octahedral crystal core.

The Second Heptagonon of Mind will set the stage for the triumph of the New Jerusalem and will reflect the first Heptagonon (created 1993-2000) which defines the psi membrane or the Earth's outer protective sheathe. The Mystery of the Stone also refers to the process of resurrection in time, and the perfection of the human soul.

The Mystery of the Stone is a journey taken by the soul alone, the purity of your intent to be with your soul alone is what wakes up the Bolontiku in ease. The Mystery of the Stone is a moral universe map for navigating the phenomenal universe of Timeship Earth 2013, by the normalizing imaginal standards of the synchronic codes of the Law of Time. By their names the Seven Major Arcana of the Law of Time define the cosmological unfolding of the power of seven. They also signify the essence meaning of the Book of the Seven Generations of which they are the Master Oracle.

### WHAT IS THE BOLONTIKU?

The Bolontiku is the invocation of the power of nine There are Nine Lords of Time or the Nine Great Lha that guard the tomb of Pacal Votan, the whole earth and the new time. Each one guards a power of the divine perfection in the unconscious during the years 2004-2013. The internal operating structure of a Bolontiku consists of nine chakras and six coordinating chakra wings.

"A Bolontiku—Lord of the Ring—has a fifth-dimensional body equivalent in length to a ring cycle of 13 baktuns, each baktun is 144,000 days. By waking up the Bolontiku, one baktun per moon, you are helping erase the karmic ledger of Babylon as history dissolves into the Lord of the Ring's internal circuits of light.

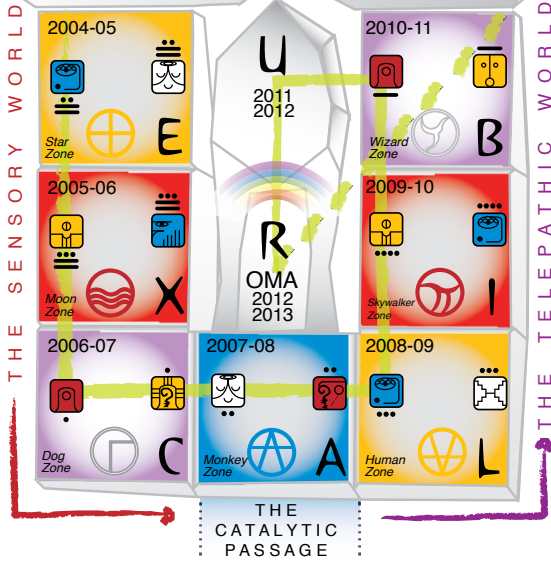

"Since the Bolontiku is so evolved—a fifth-dimensional entity—its internal operating circuit is vastly simplified, the better for comprehensive omnidirectional intelligence. Remember: As a Bolontiku wakes up, so do you!"

"The Bolontiku, the Nine Lords of time in the unconscious are the lords of descending levels of the underworld, while the Oxlahuntiku are the 13 lords of the transcendent time, 'the placenta in the sky shaped in 13 layers.'"

# MOAP

**MOTHER OF ALL PROGRAMS (MOAP)** is a construct of 64 Keys, and 192 Auxiliary keys, which are coordinated by the four Master Coordinate keys. The Dreamspell-psi bank oracle integrates the Terma or Hidden Treasure of the Red Queen in an interactive process coinciding with the Seven Years Mystery of the Stone (2004-11) to establish the principles of the Second Creation and the Resurrection in Time. The object of the telepathic game plan is the perfection of the human soul through the invocation of the New Jerusalem, the Return of Tollan, the Time of Shambhala on Earth.

1. The 64 keys are represented by the arrangement of the 64 codons in the psi bank. Divided into an AC (1-16, 49-64) upper half, and CA (17-48) lower half.
2. In the MOAP, the 64 keys are the kin 1-64 located in the same positions as codons 1-64 in the psi bank code.
3. Every Galactic Spin, once you have completed kin 1-64, the 192 auxiliary kin are activated in their sequences of 64 which are coordinated in the same positions 1-64, i.e. kin 65 is kin 1 position, kin 66 is kin 2 position and kin 128 is kin 64 position. The three sequences constituting 192 auxiliary keys are: Kin 65-128, Kin 129-192, Kin 193-256
4. The Master coordinating kin are the four kin of Harmonic 65: Kin 257-260

Kin 257—Coordinates zone of Initiation, upper left quadrant.

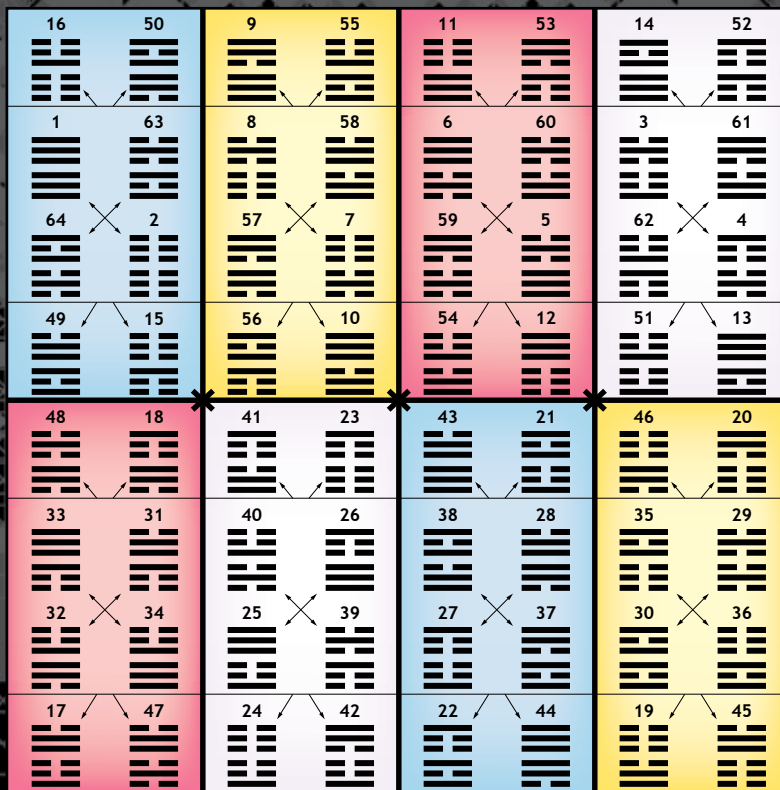

Kin 258—Coordinates zone of Refinement, lower left quadrant

Kin 259—Coordinates zone of Transformation, lower right quadrant

Kin 260—Coordinates zone of Ripening, upper right quadrant

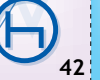

By following the G Spin every 260-day cycle, you attain a master telepathic coordination of the psi bank, UR Rune, DNA codon and galactic time codes. Find your galactic signature and assume your evolutionary position in the psi bank.

# The Wisdom Cycles

Being the compilation of the eight wisdom cycles of the Avatar's Wheel of Time, the Wheel of Becoming and the Wheel of Return, 9 Seed 2002 to 8 Seed 2012 Solar-Galactic Flowering, GM108X, 4 Star, Arcturus Shield, a system and method for the organization of the codes of the synchronic order as a compendium of Cosmic History

The Book of Harmony and Power: Wisdom is Harmony. Harmony is Wisdom self-sustained. True Power resides in the Harmony of Self-Sustaining Wisdom Cosmology of Harmony of the Eight Wisdom Cycles. The basis of the Wisdom Cycle is the minimum factor for coordinating the cycles of 8, 13, and 20 of the Avatar's Wheel of Time. This minimum factor is 520, since 520 is  $260 \times 2$ . The Wisdom Cycle consists of one G Spin of Becoming kin 1-260 and one G Spin of Return, Kin 260-1. In other words, during a return spin, you are following the occult kin of the daily kin.

## **WISDOM OF BECOMING AND RETURN**

Avatar's Wheel of Time encompasses the synchronic order as the sacred reconstitution of the self—turning the Avatar's Wheel of Time unfolds the entire cycle of wisdom. The essence of this wisdom is knowing the Wheel of Becoming and the Wheel of Return and practicing how to balance these two wheels. From the tree of becoming grows the tree of return. Seal both trees with the void seal of truth joined to itself. In the two trees are the seeds of the entire cycle of Becoming and Return.

The Wisdom Cycle consists of 5-kin chromatics ( $\times 104$ ), 8-kin octaves ( $\times 65$ ), and 40-kin harmonic octaves ( $\times 13$ ). Every octave has a harmonic of becoming and a harmonic of return. Every wisdom chromatic octave has a harmonic run of becoming and a harmonic run of return. The balance of becoming and return is the basis of the invariance and continuity of all life constituting the countless mutations of the ever-evolving biosphere. Only the error of human history seeks to negate return in favor of endless becoming, thus destroying the sacred harmony, which is the basis of life—to correct this and establish sacred reconstitution of the self, the Avatar's Wheel of Time is turned—the Cycle of Wisdom begins anew.

## **WISDOM CYCLES AND THE PRAJNAPARAMITA**

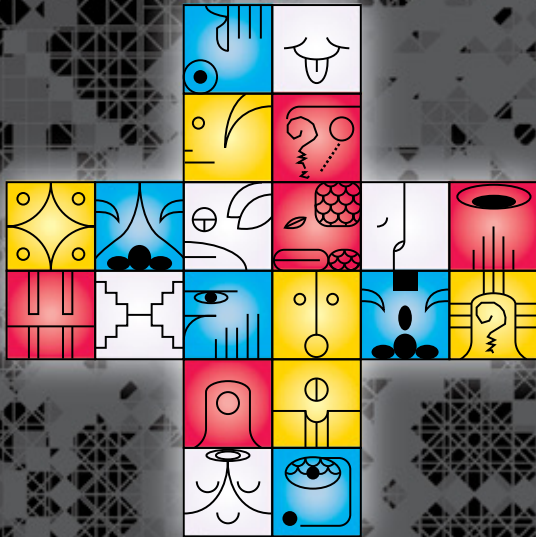

The purpose of the wisdom cycles is to demonstrate harmonic equality as a universal cosmic principle otherwise known as "equals zero." Karmic equality is the absolute balance between the manifest and the nonmanifest, becoming and return; and that there is nothing that becomes that does not return; and that anything that becomes has its own return within it, and that all things therefore ultimately manifest a void nature. The universal equalization of all phenomena is experienced as one entire wisdom cycle—260 days becoming, 260 days returning. So that in the end one can proclaim, as does the Prajnaparamita Kridaya or heart sutra:

"There is no suffering, no cause of suffering, no ending of suffering and no path; no wisdom, no attainment and no non-attainment. Therefore, since there is no attainment, bodhisattvas abide by means of transcendent knowledge, and since there is no obscurity of mind, they have no fear; they transcend falsity and pass beyond the bounds of sorrow. All the Buddhas who dwell in the past, present and future by means of transcendent knowledge, fully and clearly awaken to unsurpassed, true complete enlightenment."

## The 28 Principle Postulates ~ 1-8

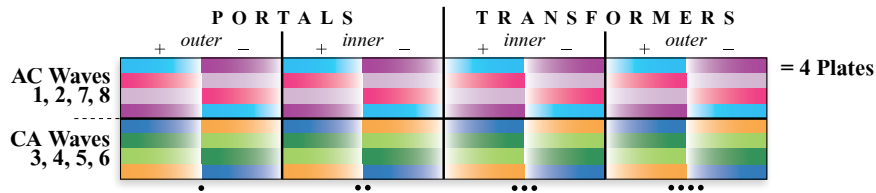

1. From our present state of perception, the fundamental nature of universe is mind – universe is ultimately a mental quality.
2. Being mental in nature, mentation – mental activity – is the normal pattern of movement in the universe.
3. That is, all phenomena, perceivable and imperceivable, are ultimately products of universal patterns of mentation.
4. These universal patterns of mentation have one common origin, (“God”), and, hence, are characterized by a holonomic consistency of relationship to each other and to their own intrinsic processes.
5. The holonomic pattern of consistency of mentation encompasses and is a function of the primary law of binary alternation, which, to establish itself as a minimum whole order, recapitulates itself in eight different stages, producing eight different ways, or, more precisely, “waves.”
6. The complete law of holonomic consistency of mentation is known as binary crossover polarity, which creates a self-consistent whole order of  $64^n$  possibilities of mentation.
7. The primary code establishing a self-consistent holonomic wave pattern is thus established:  
 (+ –) = primary alternation, establishes first set, first stage – “Open the Gate” (2 charges)  
 (+ –, – +) = alternation of alternation, 2 sets, stages 2 & 3 – Wave Transformers (4 charges)  
 (– +) = primary alternation reversed, 1 set, stage 4 – “Close the Gate” (2 charges).
8. Through holonomic permutation this primary wave pattern, requiring two levels to run its four stages and eight charges, creates a total set of eight wave patterns whose relation to each other replicates the same fundamental holonomic sequence or pattern:

This set establishes a binary binding set which reverses the movement but is of the same pattern as that which it encloses. Thus we distinguish between two types of wave patterns – internalizing and externalizing (Binding):

9. These two sets establish the primary sequence (AC) of Internalizing and Binding wave patterns. The process of binary crossover polarity thence establishes a secondary polar field (CA) of mirror symmetry, constituting waves 3 (Binding) and 4 (Internalizing). These in turn establish a reverse motion, creating waves 5 (Internalizing) and 6 (Binding), to complete the secondary polar field (CA). This necessitates a concluding binary crossover polarity mirror symmetry to create reverse motion waves 7 (Binding) and 8 (Internalizing) in the primary polar field AC, thus exhausting the possibility of permutations.
10. This self-creative process establishes the sum of eight waves of mentation, or galactic brain waves, the normative field of Universal Mind. These eight sets are distinguished according to the process of binary creation into two categories: Sets/Waves 1-4 establish the Crystal Mind. Sets 5-8 establish Cosmic Consciousness.
11. These eight galactic brain waves establish a 64-unit matrix in which the same sequence of charges for any wave (+ -) (+ - , - +) (- +) is recapitulated as the same pattern (2) (4) (2) of waves in sequences (1, 2 AC) (3, 4, 5, 6 CA) (7, 8 AC). Each wave pattern is different from the others due to the division of the Matrix into two polar halves (AC and CA), and two lateral halves. (Portal and Transformer), which, each with its Inner and Outer halves, form four Plates:

12. Just as the Plates are divided into two halves each, for a total of four plates, each plate divided into + and -, for a total of eight sections, so are the AC and CA each divided into four horizons, for a total eight sections:

**PLANETARY** × 2 (AC, CA = 8 Horizons × 8 +- sections = 64-unit matrix of mentation)  
**LUNAR**  
**SOLAR**  
**GALACTIC**

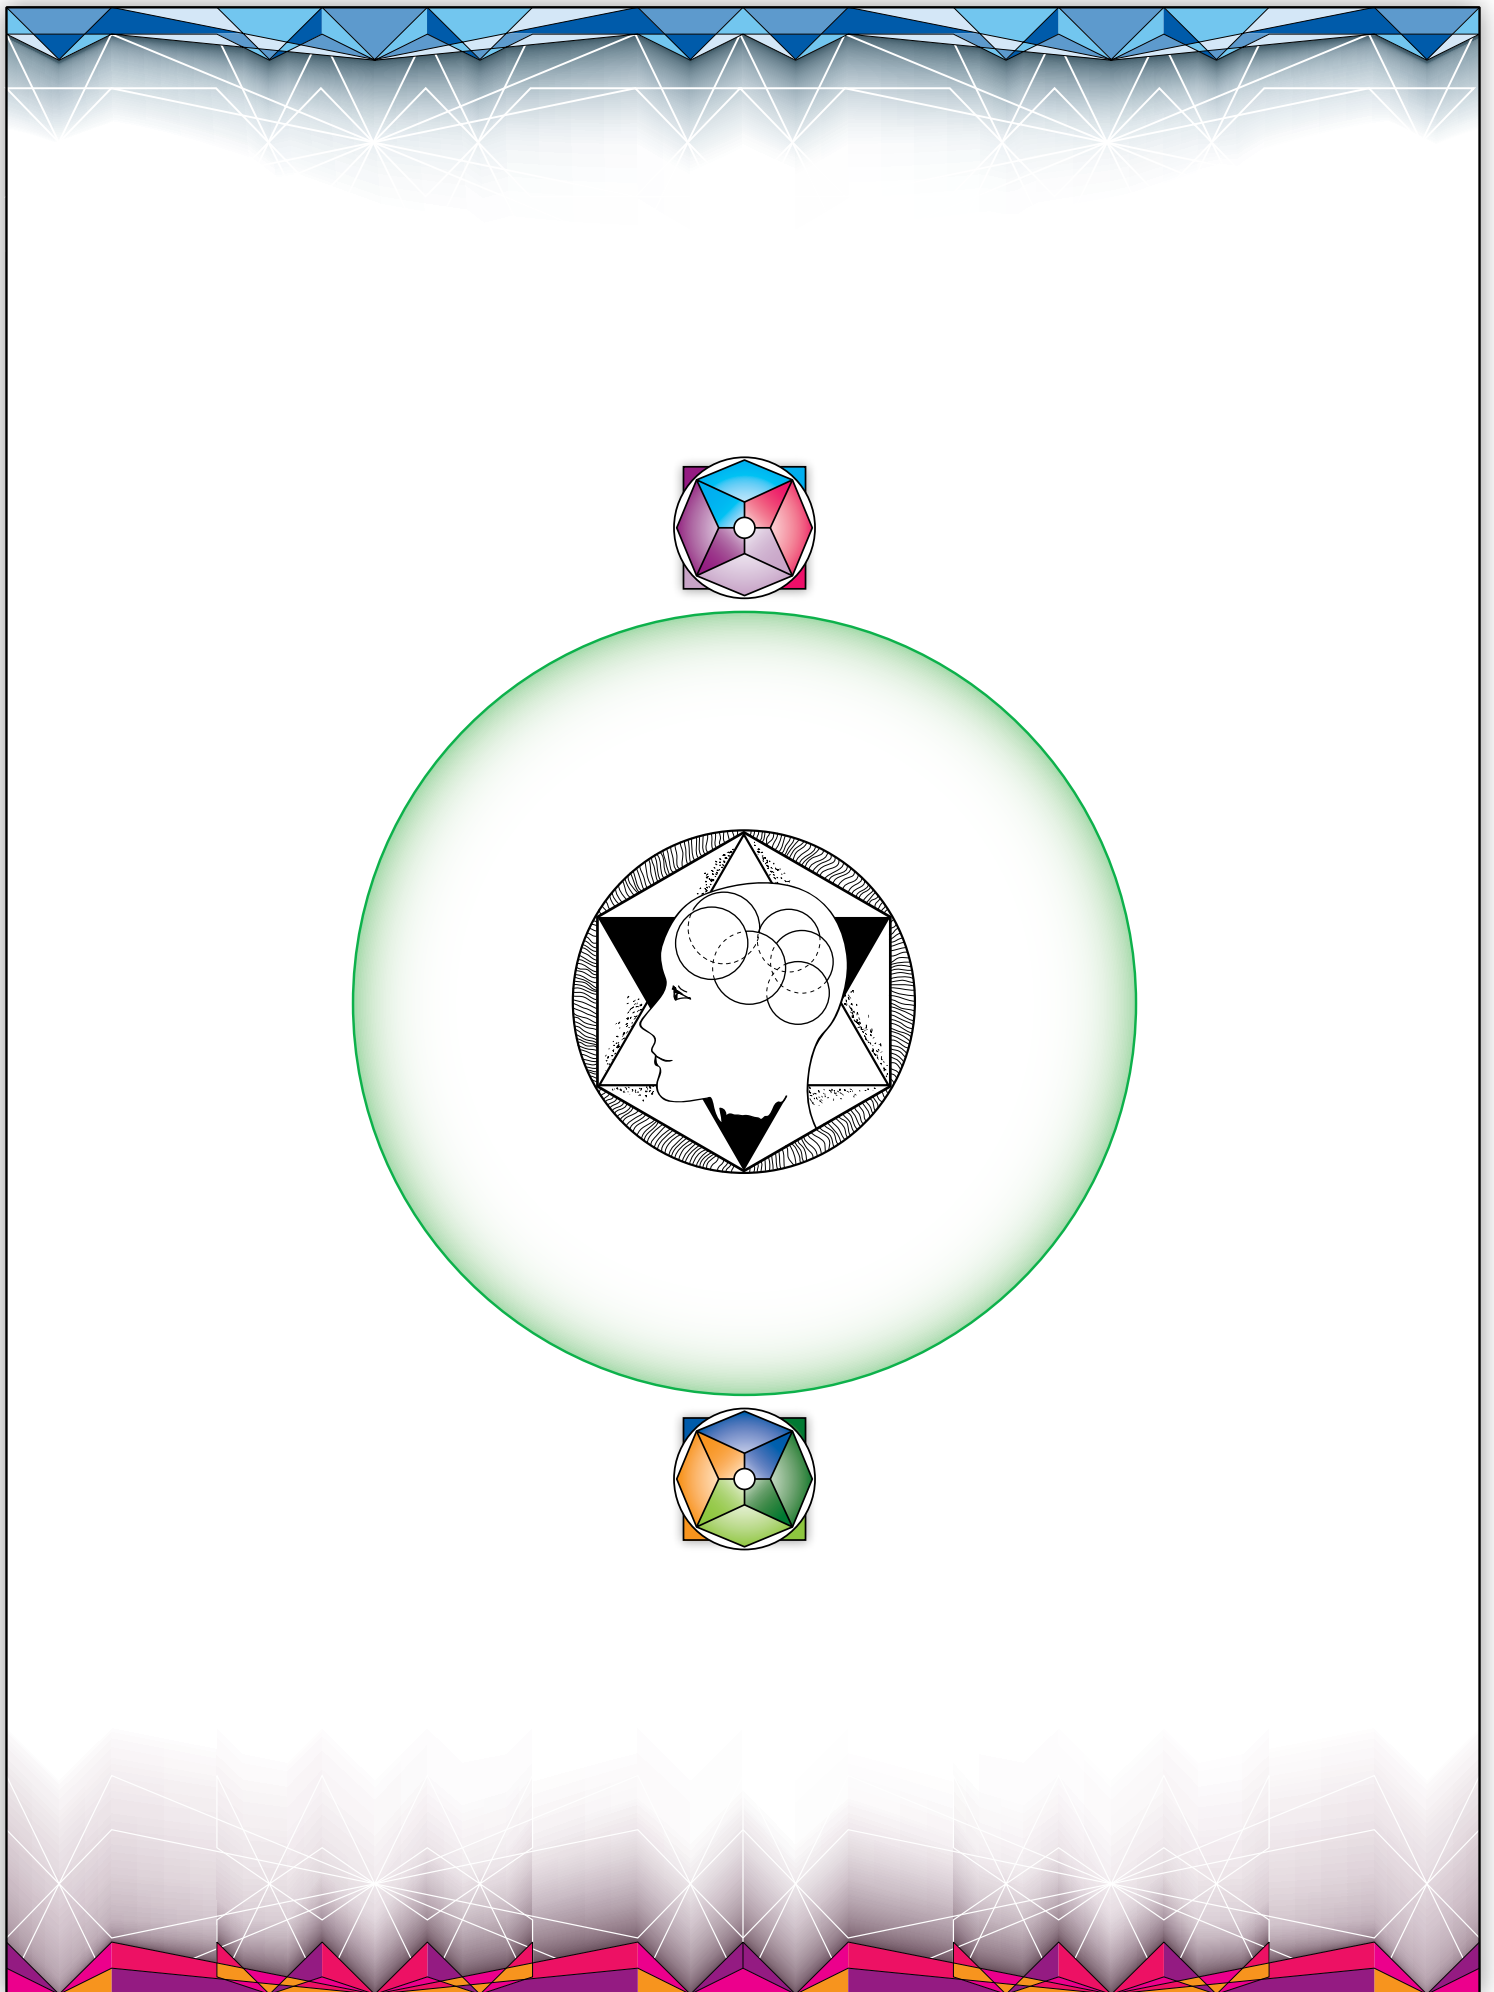

13. This matrix of 8 galactic brain waves of 64 permutational possibilities establishes the 8×8 (64) UR Rune strands, where the UR Runes follow a Rune Triplet Code (+ - +)(- - +)(- +). The UR Rune binary triplet codes represent condensations of mentation for the ordering of universal evolutionary possibilities.
14. The 64 UR Runes govern one each of 64 six-part Codons, which, as primary light codes, govern the binary spin possibilities of the Universal life structures or DNA.
15. By the Law of Time,  $T(E) = Art$ , where T = 13:20 frequency, each codon has a permutation sequence that runs through 13 stages, for a total of 832 primary light code pulsations underlying the eight mentation sequences or galactic brain waves, 104 per brain wave.
16. All of the foregoing laws and principles describe the intrinsic structure of the eight processes of universal mentation arising from the simple application of the principle of binary crossover polarity, and which establish the constructs of the universe, perceivable and beyond perception.

## The Correct Laws of Thought

The 28 Principle Postulates ~ 17-28

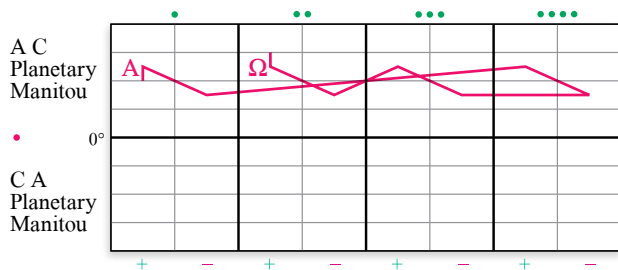

17. From our present state of perception and cognitive capacity these waves of mentation and the laws governing them constitute the CORRECT LAWS OF THOUGHT.
18. What we call “thought” is a largely inadequate and incorrect form of universal mentation as it is manifest through the eight Galactic waves.
19. Because the Law of Time has been unconscious until the present evolutionary event horizon (2012-2013), the Correct Laws of Thought have been unknown, though their existence has been gleaned by a few thinkers, here and there.
20. As a result of living in ignorance of the Correct Laws of Thought, the human level of mentation has operated by unconscious and incorrect laws, randomly standardized into machine units which have yielded arbitrary patterns of thought that are illogical, internally self-conflictive, inconsistent and obsessively neurotic.
21. Having institutionalized everything but how to think clearly by seeing directly into the nature of mind, the human awareness of its inadequate and incorrect thought processes remains at an intolerable level of irrationality.
22. It is to assist the evolution out of this degraded mental state that the Correct Laws of Thought are introduced.
23. The immediate purpose of the presentation of the Correct Laws of Thought is to memorize and telepathically engrave them into the corpus callosum.
24. Once engraved into the corpus callosum and activated through daily yogic breathing exercises, the human capacity to think will finally evolve to the level of participating in the dynamic of the eight galactic brain waves and the field of universal mentation.
25. Once the human capacity for mentation has begun to operate by the cosmically hygienic standards of the Correct Laws of Thought, the noosphere will become operable.
26. Being a cosmically ordained supermental planetary function, the noosphere is a holonomic reflection of the universal field of mentation and is governed by the same patterns of the eight galactic brain waves, which establish in the noosphere, the Way of Conduct and the Way of Wielding Power, each with their four UR Rune Strands.
27. By natural resonance with the noosphere, the human brain, properly regulated by the Correct Laws of Thought, will attain peak performance as an instrument of galactic thought common to the advanced orders of universal life, and will naturally attract whatever necessary processes of cosmic mentation.
28. Since all of Universe is coded by the same galactic brain waves and six Mental Spheres, by following the Correct Laws of Thought, the advanced (super)human will normalize the paranormal and, through purely mental exertion, will gain access to all of the dimensions with Divine Authority.

# 13 Baktun Map

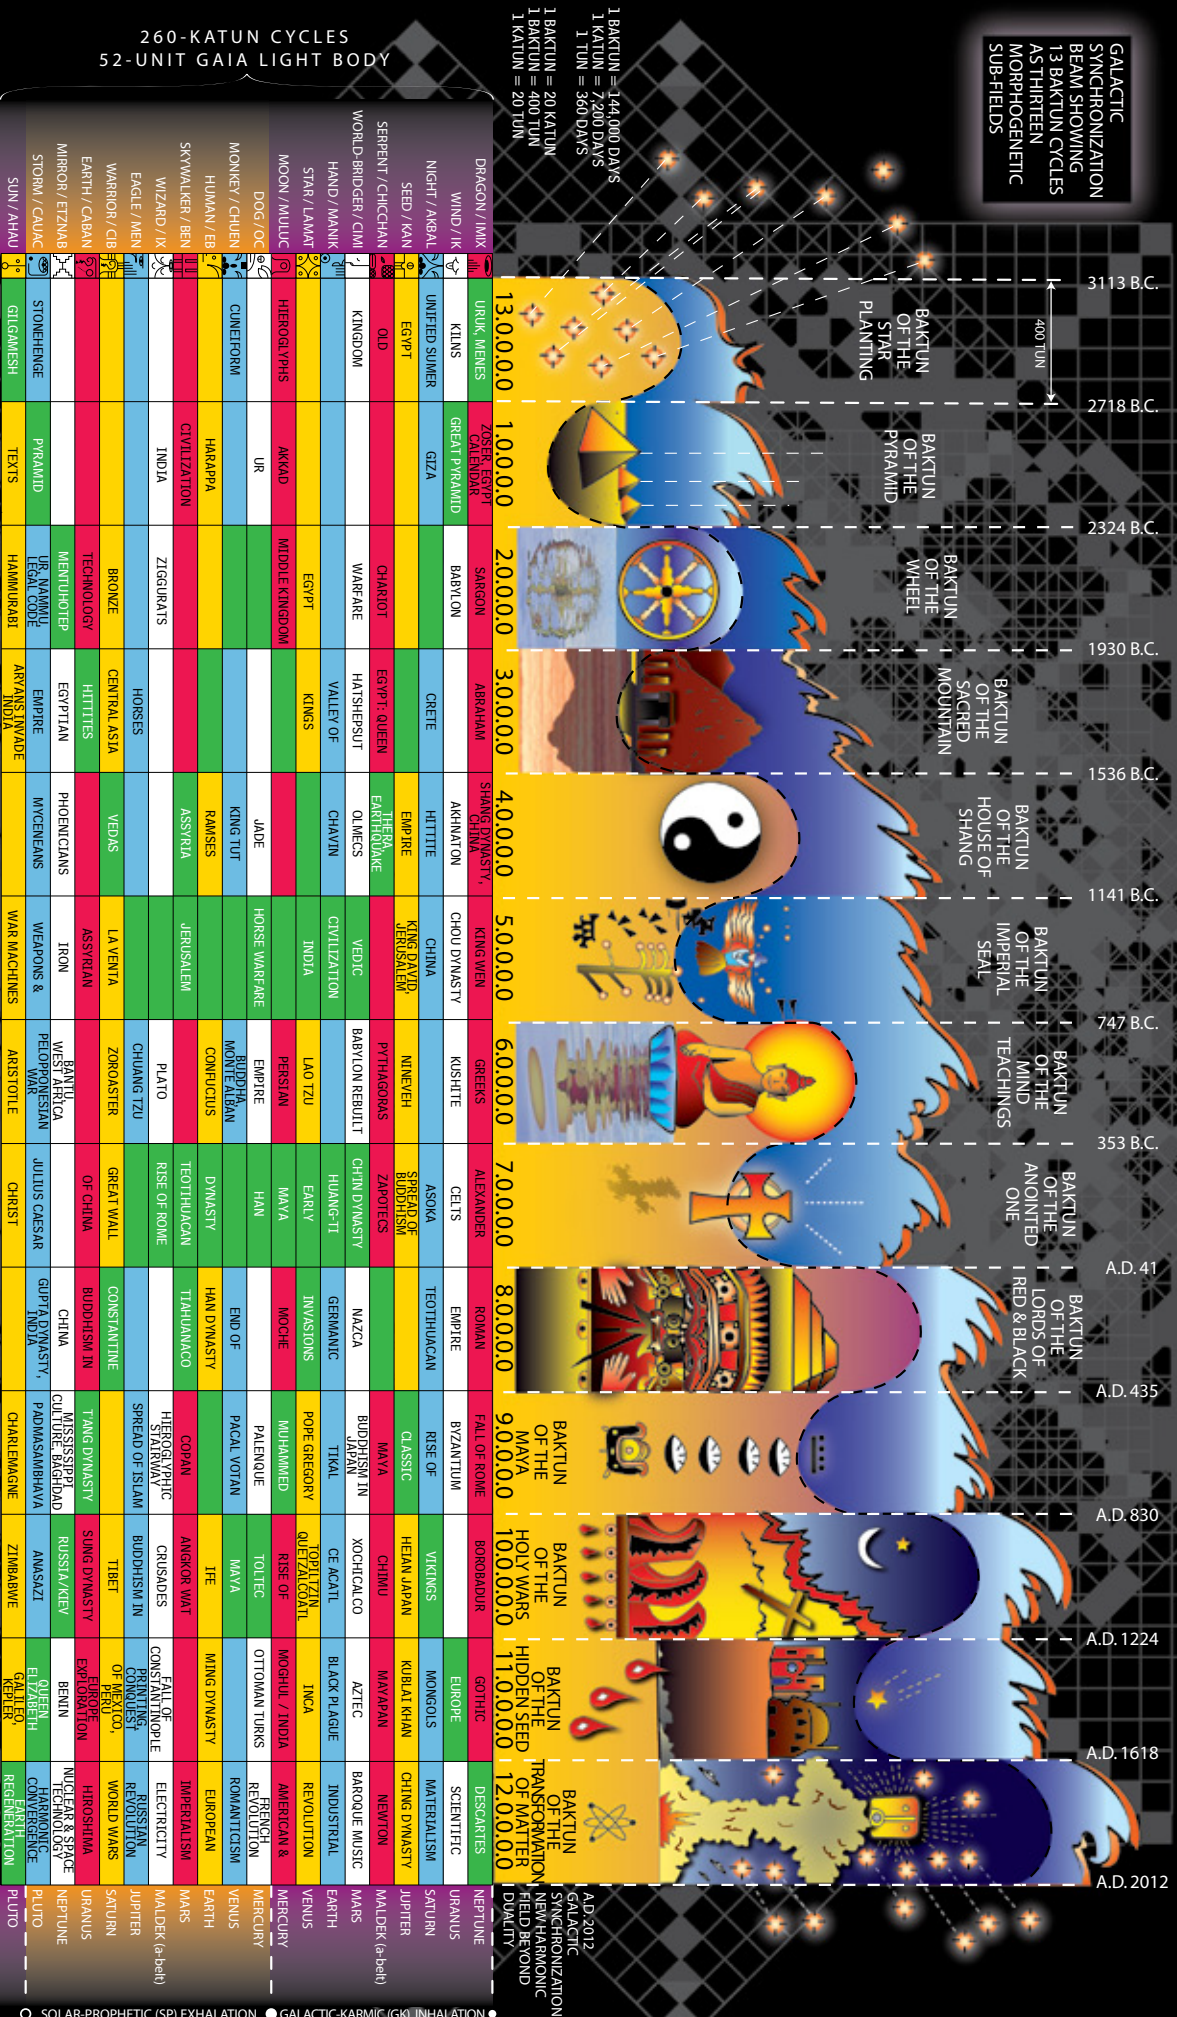

Each of the 13 columns shown on page 99 are called baktuns. Each baktun is made up of 144,000 days. Scholars quibble about the exact date that the 13 baktun cycle began. Some say August 13, others August 11, yet others August 6, 3113 BC or 3114 BC. In any case it is more than 5,100 years since the 13 Baktun Cycle began and it is only some six years before it reaches completion, 2012. It should be noted that the first cycle is baktun 0, the second is baktun 1, etc. meaning that a cycle is not counted until its duration has elapsed one round.

Counting from the left or right you see the seventh (which is the sixth baktun) in the center. You see a symmetrical pattern on either side of the 7. There is nothing of the green symmetrical pattern (called the Loom of Maya) in this Baktun.

### **LONG COUNT AND DREAMSPELL COUNT**

Long Count is literally that—count of days in the 13 baktun cycle—1,872,000 days in all, from 4 Ahau (Aug. 13, 3113 BC) to 4 Ahau (Dec. 21, 2012). Still kept by the Quiche and traditional Maya and Mexicans. Note: August 16, 1987 (Harmonic Convergence) = 1 Imix on the Long Count, the first day of the 260-day cycle. (1,872,000 = 7200 260-day spins.)

The Dreamspell (Wizard's) Count uses the same 260 kin (days) as the long count, but in combination with 13 moon/28 day calendar to establish the synchronic order—the index of measure of synchronicity—synchronizes with 365-day 13 Moon calendar every 52 years. Does not recognize Leap year day and so purity of synchronic order is maintained. Correlated from July 26, 1987 = 8 Wizard. The Dreamspell Count follows a four year patterning year-bearers: Seed, Moon, Wizard, Storm—always creates a harmonic pattern with the long count. July 26 is the prophetic date of the Chilam Balam tradition established at the time of the dedication of the tomb of Pacal Votan, 9.13.0.0.0, correlates with the rising of the star Sirius.

## What will happen at The end of the Mayan calendar?

Rhythmic Solstice, 2012, marks the conclusion of the Great Cycle of History, the completion of exactly thirteen Baktuns, 260 Katuns, 5200 Tun, or 5125 years which commenced BC 3113. This 2012 date also concludes the 26,000-year evolutionary cycle, which encompasses the evolution of our species as homo sapiens, from cave dweller to modern urban human. The purpose of the Mayan cycles is to give us perspective to show the stages of our evolution. For instance, the thirteen Baktun cycle of history is only one fifth of the entire 26,000-year cycle. This means that only the last 20 per cent of the cycle of our evolution was spent in the development of cities, and of this final cycle of development only the last five per cent of it, or 260 years, has seen the rise of industrial technological civilization.

The Maya knew that the galaxy and the entire universe operate as a whole system bound by one common timing frequency, the 13:20. Within this large order of reality, are countless cycles within cycles, which establish all of the different evolutionary phases of all of life throughout the galaxy. The ending of a cycle does not mean the end of the world. But a cyclic ending like that which will occur in 2012 does signal a moment of great change—and the beginning of a new evolutionary cycle. The point of the prophecies is to prepare us for this moment of great change. Also, according to the Mayan prophecies, we cannot just expect that we will change, but we must prepare for this change.

The preparation for this change is to return to living in harmony with nature. If we can return to living in harmony with nature by 2012, then our world will not end in disaster, but will enter a higher level of spiritual and mental evolution. But if we cannot return to living in harmony with nature, then our biosphere will collapse and our world will end in disaster. There is evidence that a civilization had developed on Mars, which totally destroyed its atmosphere. And the existence of the Asteroid belt beyond Mars also indicates the existence of a planet that blew up or was shattered to pieces. These are signs for us to prepare for 2012 and avoid such endings for our planet.

The **Planet Art Network** is the organization around the world that promotes the 13-Moon calendar and the idea that when we are all living once again in natural time, when we have become once again one human family united in one common time, in a time of harmony, and we are now what we know as a global species living in a global society, we will transform that global society into one huge Planet Art Network. Since we've made such a mess of the planet we have to clean it up. The goal will be to make the planet an exquisite work of art. That's the value of being in this 13:20 time of harmony.

# Who's spinning?

When you Meditate consider that you are on a sphere, V.24.3, orbiting a star, V.24, at 66,666 miles per hour covering a distance of 585 million miles every 365 days, and that this star is one of a billion in this galaxy which is one of 100 million galaxies we could observe.

Who and what are you, then?

What keeps this sphere spinning so rapidly revolving on it's axis every 1,600,000 miles of its orbit - 800,000 miles a day, 800,000 miles a night, same as the diameter of the sun, 800,000 miles ...

Yes, Whose thoughts are thinking you in this fractal slice of the ultimately immeasurable synchronic order?

2012 this way

Earth's orbital circumference = 585,000,000 miles  
 @ 365 days = approx. 1,600,000 miles per day  
 = approx. 45,000,000 miles per 28 day Moon  
 = 66,666 miles per hour = 1111 miles per minute

## DAY OUT OF TIME

7/25/2013

### BLUE RESONANT NIGHT

I channel in order to dream  
Inspiring intuition  
I seal the input of abundance  
With the resonant tone of attunement  
I am guided by the power of vision

Invoke the Bolontiku ...  
Primordial Knowing Body Lha,  
the Ninth Lord of Time!
