

1.34.3.14 Red Resonant Skywalker and the Matrix 33-999

Dear synchrononauts:

For the first time in history (or rather, post-history) the 33:999 matrix is presented.

The 33:999 matrix is a numerical resonance matrix that has the function of inspiring and revealing a deep connection between the mathematics of the dimension of space (3D) and the mathematics of the dimension of time (4D).

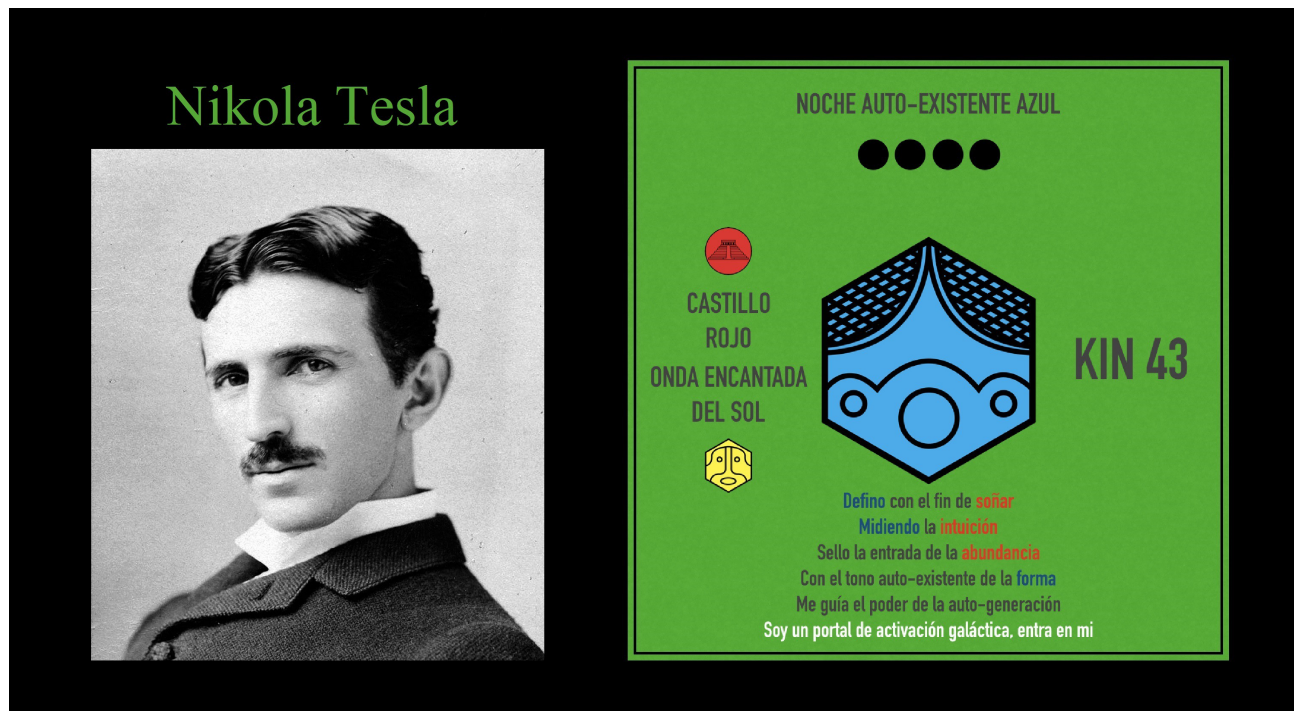

The starting point of this explanation is given by the mythical sentence that Nikola Tesla shared at the time: "If you knew the magnificence of the numbers 3, 6 and 9, you would have the key to the universe."

Before beginning the explanation of this study, the reader must be warned that in order to understand what is going to be shared next, it is necessary to have at least basic notions of what the Law of time is and how it manifests itself through the synchronic order and time codes.

That said, as was already mentioned, Nikola Tesla was one of the greatest geniuses of

our modern era in the early 20th century. His great contributions to humanity include the invention of the alternating current induction motor as well as the discovery of cosmic rays.

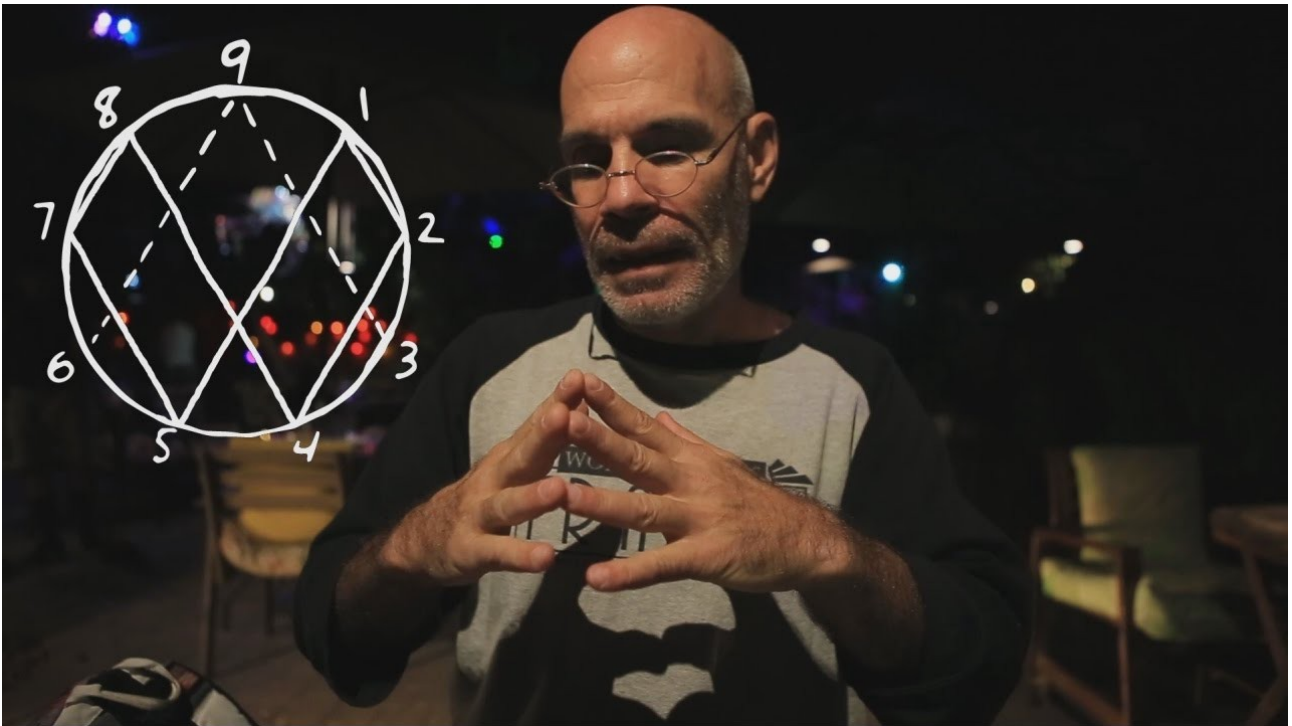

It is known that Nikola Tesla had an obsession with the number 3 and it is not surprising since in reading the time codes he was **KIN 43 Blue Self-Existing Night** being this the perfect hidden KIN of KIN 218 White Planetary Mirror, important for being the KIN of the opening date of Pakal Votan's tomb.

Following in the wake of Nikola Tesla, various personalities from the world of science and spirituality have raised various theories regarding Nikola Tesla's sentence about the relationship between 3, 6 and 9 without reaching any conclusion that has scientific rigor .

No one managed to come up with anything consistent removed from Marko Rodin, the main creator of vortex mathematics.

Vortex mathematics has the function of explaining the universe starting from the relationship that exists between the numbers that go from 0 to 9, decimal system or also defined as mod 9.

According to vortex mathematics, numbers should not be seen as quantities but also have qualities that arise from the relationship between them.

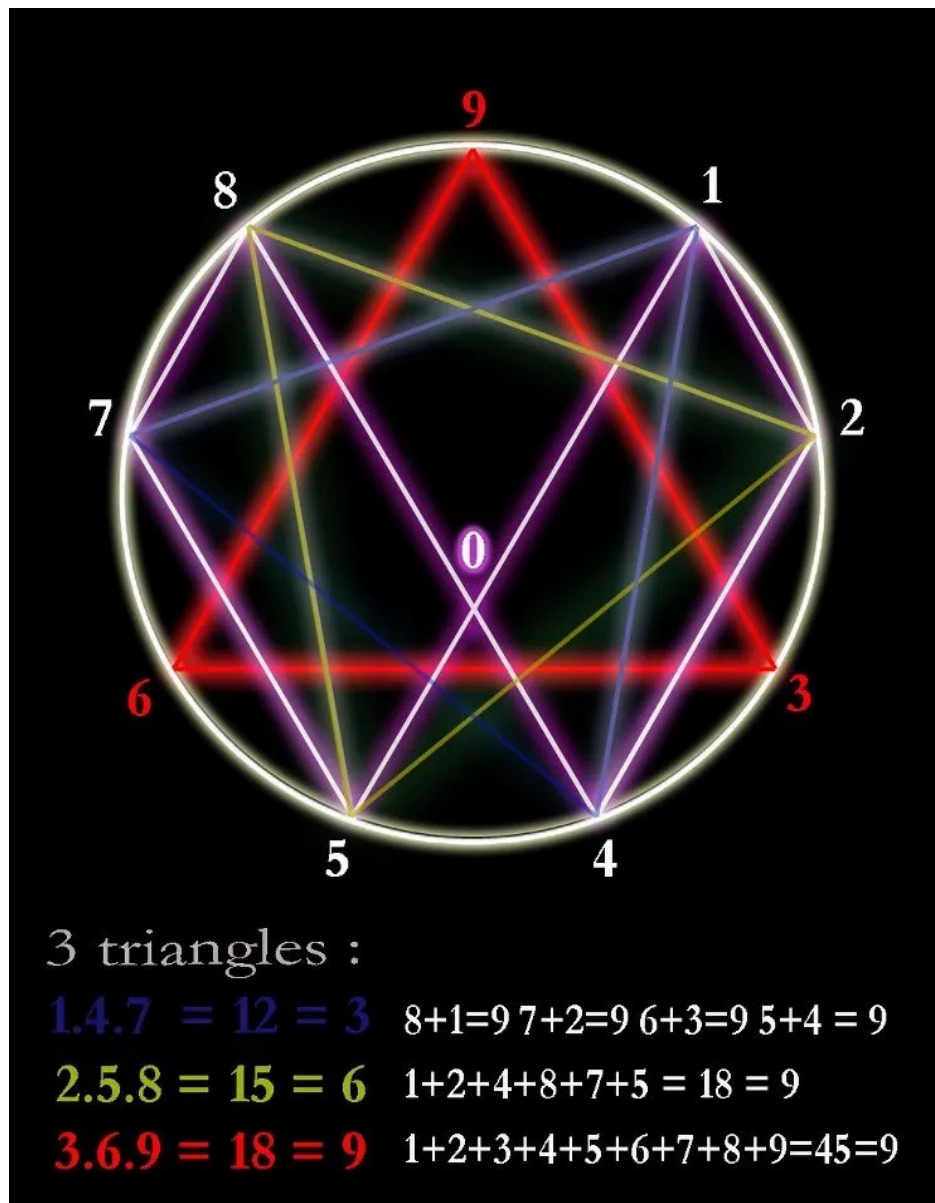

Here is a video that clarifies what vortex mathematics is:

→ <https://www.youtube.com/watch?v=1iqmaAPKPIg&t=161s>

In summary, vortex mathematics explains:

- An underlying major pattern within the decimal system ranging from 0 to 9.
- Like any number greater than 2 digits, it can be reduced to a 1 digit number, what is called the digital root. For example, 43 has the digital root 7 because $4 + 3 = 7$.

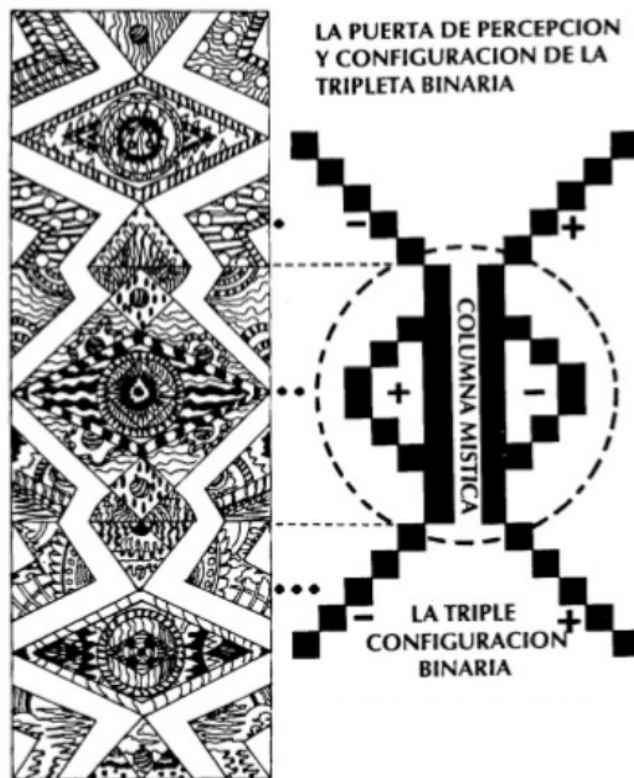

- As within the main pattern the numbers 3, 6 and 9 follow a different repetition line than 1, 2, 4, 5, 7 and 8.
- Since the number 9 is the axis of all patterns.

Although the vortex mathematics is really dazzling, it is not the reason for this study. Vortex mathematics has its application in the dimension of space (3D) and has been presented basically to create a frame of reference with respect to the numbers 3, 6 and 9.

The really important thing that is going to be revealed here is the ratio of these numbers in the dimension of time (4D) to create the matrix 33:999.

The first starting point to explain the 33:999 matrix is undoubtedly the 260 code Tzolkin matrix and the triple binary configuration that underlies it.

The triple binary configuration appears for the first time scientifically explained in the book “Earth Aascending” by Jose Argüelles and later in “The Mayan Factor”.

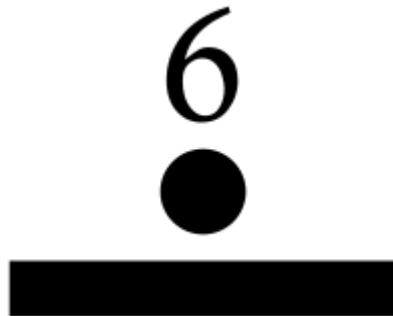

The triple binary configuration has the function of activating the fractality of the Tzolkin with 26 activation codes in its first part and 26 activation codes in its second part after passing through the central column or mystical column that does not contain any activation code.

Hence the name "binary triplet" because in turn each of the 2 parts can be studied in 3 more specific parts or seen in another way, the doubling of the triplication.

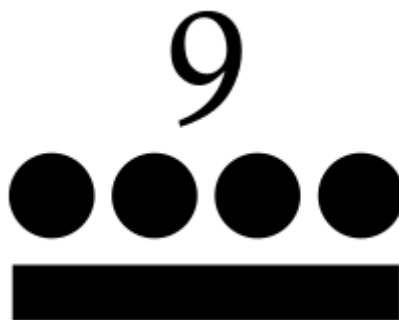

This is when we can begin to find deep relationships starting from this number 3 that within the galactic tones receives the name of the electric tone (3) with the power to activate and the action of uniting.

It is interesting to see that this activation power, when it is duplicated, we obtain the rhythmic tone (6) with the power to organize and the action to balance.

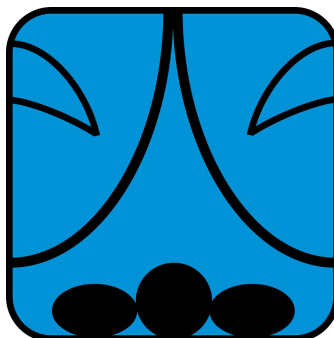

And that when this activation power is tripled, we obtain the solar tone (9) with the power of pressing and the action of performing.

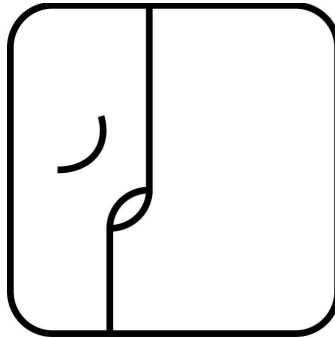

The most important thing about this relationship is that ignoring the other tones, the deep relationship manifests itself as we study these numbers within the galactic tones.

If we turn to the solar seals we will obtain the same revealing observation.

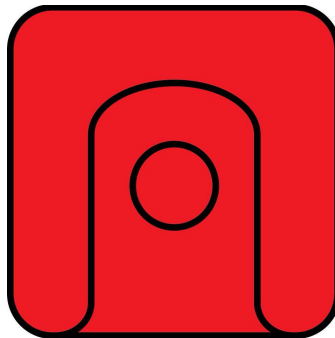

The seal 3 that represents the Night's seal (3) has the power of abundance.

If we double the power of abundance we obtain the World Bridger's seal (6) that has the power of death.

And if we triple the power of abundance we obtain the Moon's seal (9) which has the power of universal water.

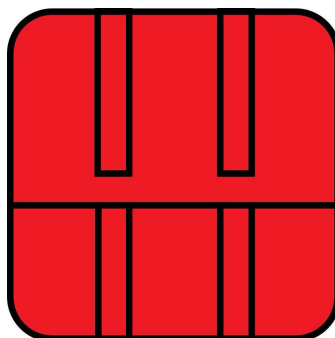

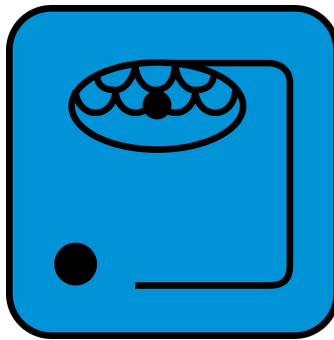

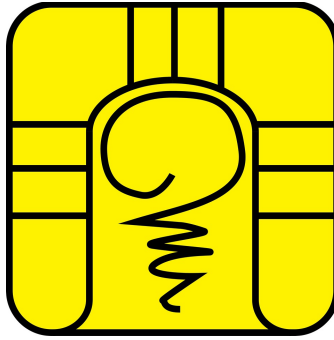

In turn, its pairs of antipodes will be important in this study since they are the reverse of the duplication: the Skywalker's seal (13) with the power of space, the Warrior's seal (16) with the power of intelligence. and the Storm's seal (19) with the power of self-generation.

$$13 = 3 + 10$$

$$16 = 6 + 10$$

$$19 = 9 + 10$$

Once the numerological bases have been established, we can begin to weave in a more concrete way what would be the doubling of the triplication that the 33:999 matrix builds.

So what are the numbers that make up this matrix?

As observed and given the deep relationships that exist between 3, 6 and 9, this matrix is formed by numbers that contain at least 2 of these 3 numbers 3, 6, 9. Eureka!

That is the doubling of the triplication or as it was said previously, another way of expressing the binary triplet from a coherence relative to the paradigm of 3, 6 and 9.

The first number we come across already contains a lot of information on its own, the number 33 which is encoded as **KIN 33 Red Resonant Skywalker**.

This master number that contains 2 times the 3 is the first sign of the principle of doubling of triplication.

The number 33 is also a master number for several reasons that are going to be expressed below:

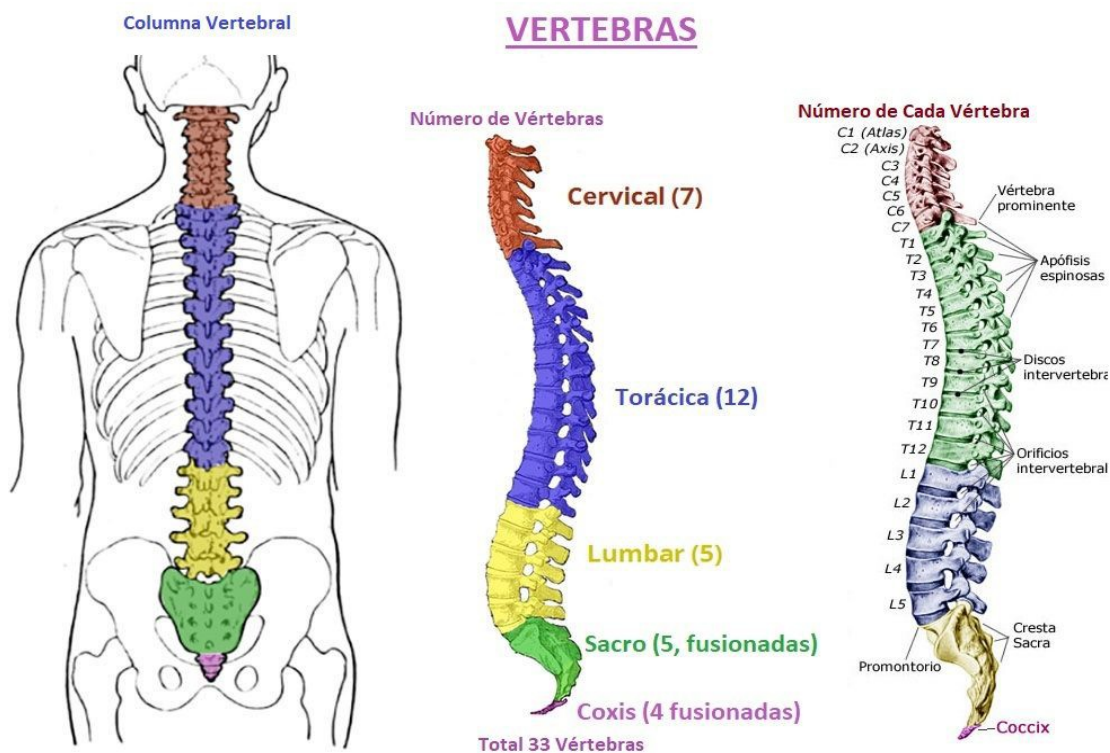

33 is the number obtained by summing the two numbers that make up the frequency 13:20, $13 + 20 = 33$.

33 is the number obtained by adding the KIN of Jose Argüelles, [KIN 11 Blue Spectral Monkey](#) and the KIN of Lloydine Burris, KIN 22 White Solar Wind, $11 + 22 = 33$.

33 is the number of columns in the human body and where the 7 chakras pass. As an interesting timing, $33 \times 7 = 231$ where $2 + 3 + 1 = 6$ or is the doubling (2) with the tripling (3) plus the factor + 1. 231 can also be seen as $218 + 13$.

33 is the maximum degree of mastery that a Mason can achieve within secret societies.

At this point, knowing the dynamics that the 33:999 matrix builds, we offer below the 21 numbers found within the Tzolkin. These are: 33, 36, 39, 63, 66, 69, 93, 96, 99, 133, 136, 139, 163, 166, 169, 193, 196, 199, 233, 236, 239.

The numbers 263, 266 and 269 have precisely as KINs equivalent to 3, 6 and 9 since they are the numbers that we obtain by subtracting 260.

The numbers 293, 296 and 299 have as KINs equivalent to 33, 36 and 39 again so they would not be included in an important way within this first section.

These numbers are grouped from 9 to 9 being like this:

1st section: 33, 36, 39, 63, 66, 69, 93, 96, 99.

2nd section: 133, 136, 139, 163, 166, 169, 193, 196, 199.

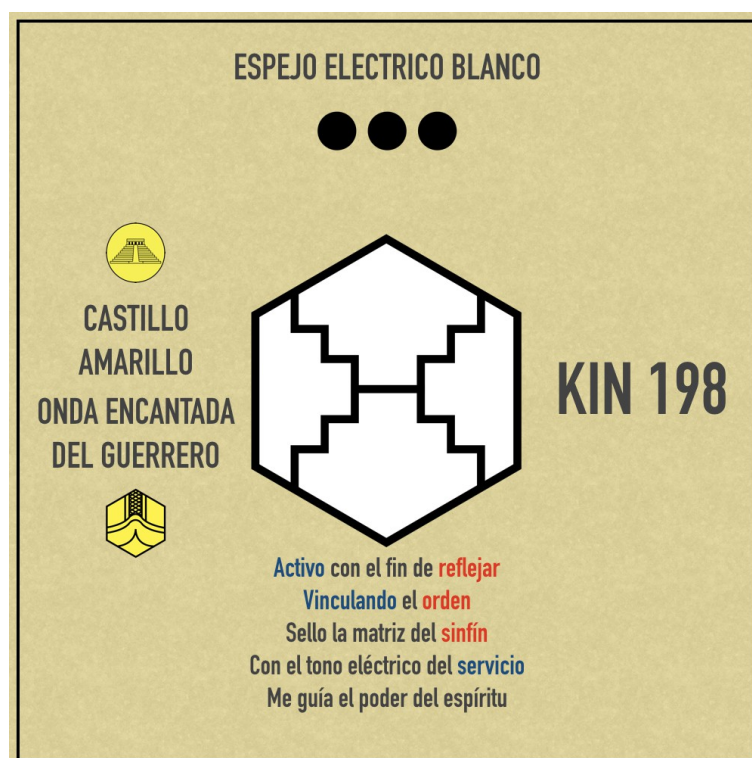

3rd section: 233, 236, 239, 263, 266, 269, 293, 296, 299.

The relationships that these numbers create are important, for example adding 3 by 3 the numbers in the 1st section:

$33 + 36 + 39 = 108$ which is **KIN 108 Yellow Self-Existing Star** and is the Sirian Channel number GM108X.

$63 + 66 + 69 = 198$ which is KIN 198 White Electric Mirror, is the hidden KIN of KIN 63 Blue Spectral Night and is the sum of $99 + 99$.

$93 + 96 + 99 = 288$ which is KIN 28 Yellow Moon Star ($288 - 260 = 28$), it is the

number of the fourth lens of time 288/ Ultimate Sphere and the number that encodes the Snake Initiate in the Hunab Ku 21 matrix.

For now this is the first part of the study. This 33:999 matrix has infinite applications within the mathematics of the dimension of time (4D) so it should serve to better understand the nature of numbers.

This explanation cannot be extended any further since humanity on this planet is still not prepared to assimilate numbers that contain galactic information of a higher degree without the vast majority having assimilated the elemental degree.

On the other hand, how capitulation will be provided some approximations about the number 999 that will be explored in subsequent galactic reports, as well as making clear the importance of the 6 Great Master Numbers that are within this matrix that are the 369, the 396, the 639, the 693, the 936 and the 963.

Now, next 9 important equivalences about the number 999:

$$999 = 27 \times 37$$

$$999 = 441 + 441 + 117$$

$$999 = 369 + 369 + 260 + 1$$

$$999 = 364 + 364 + 218 + 1$$

$$999 = 260 + 260 + 260 + 218 + 1$$

$$999 = 441 + 260 + 218 + 67 + 13$$

$$999 = 441 + 260 + 218 + 79 + 1$$

$$999 = 333 \times 3$$

$$999 = 111 \times 9$$

Until the next galactic report.

Sincerely,
Galactic Maya 999.
