

JOSÉ ARGÜELLES
&
LLOYDINE BURRIS

It is thanks to José Argüelles and Lloydine Burris that the synchronic order and the Law of time become conscious on planet Earth.

Your contribution to planetary consciousness is transcendental for this new evolutionary stage.

Among other contributions, they are the creators of the “Dreamspell” account to adapt time codes to our time and thus transmit the synchronological tale. This tale begins mainly after the opening of the Tomb of Pacal Votan.

Recommendations: Read 'The Mayan Factor' by José Argüelles.

THE LAW OF TIME $\text{TIME} \times \text{ENERGY} = \text{ART}$

The Law of time discovered by José Argüelles makes us aware that in the universe, everything is “a work of art.”

Everything animated is created and creator at the same time. Everything serves a conscious-aesthetic purpose that is renewed with evolution.

To be aware of the Law of time is to be aware of your divine abilities, to create and manifest in the physical world an idea from the realm of the imagination.

Whoever despises the Law of time lives from the slavery of cause and effect, determined by the ego and the unconsciousness of the inanimate material world.

Recommendation: Read 'The Discovery of the Law of Time' by José Argüelles.

SYNCHRONIC ORDER

The synchronic order is how consciousness is ordered by the dimension of time (4D).

Everything in the universe is in sync. The synchronic order is the universal norm that connects the visible with the invisible.

Earth is a “free will” planet, and for millennia, until 12/21/2012, the synchronic order has only been functional on a subconscious level.

In this new era, it is thanks to the understanding of the synchronic order that humans can continue to evolve and awaken the true language of the universe: the language of telepathy.

Knowing and understanding the synchronic order allows you to make the unconscious conscious.

THE 13 MOONS

When the Earth completes one revolution around the Sun, the Moon completes 13 revolutions around the Earth.

The lunar cycle is synchronized with a woman's menstrual cycle, approximately 28 days per cycle.

If we adopt this measurement and adapt it to the mathematics of 4D, we obtain that 13 lunar cycles of 28 days + 1 day outside this time make 1 year. $[13 \times 28 + 1 = 1 \text{ year}]$

To live in the new era, adopting "the Synchronometer of the 13 Moons" makes us more aware of the Law of Time and the synchronic order.

Recommendation: Read "The Dreamspell" by José Argüelles & Lloydine Burris.

TZOLKIN / MODULO ARMÓNICO

The Tzolkin, or Harmonic Module, is a tool that connects us with the study of the dimension of time (4D).

Among other functions, it orders us humanly at a synchronic level with the planetary time of the 13 Moons.

The Tzolkin, although at the level of tradition it is said to come from the classic Mayans, in its essence it contains the galactic code of our DNA, which was discovered by José Argüelles.

The Tzolkin builds a relationship of cycles that makes it easier for us to understand that the human form is fractal and holographic.

Your date of birth places you in one of the 260 KINs of the Tzolkin, and this allows you to identify the characteristics of your adventure over time. Do you already know your KIN?

www.ordensincronico.com/el-tzolkin

THE 20 SEALS & THE 13 TONES

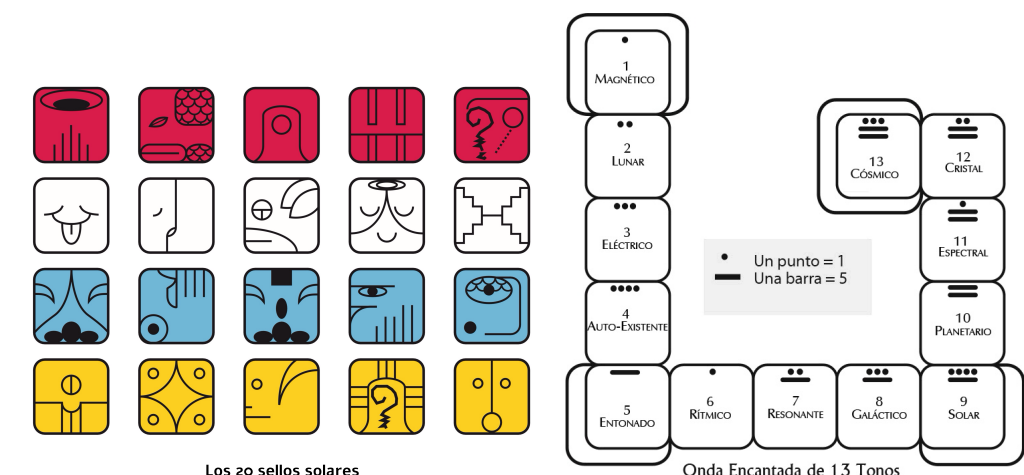

The Tzolkin analogically is a representation of the 13:20 frequency.

The 13:20 frequency is the structure of our physical and mental reality as fractal beings that we are with respect to time.

The 20 seals are the 20 fingers of our body, and the 13 tones are the 13 major joints (2 ankles, 2 knees, 2 hips, 2 wrists, 2 elbows, 2 shoulders, and the neck). These combined articulations make up the 260 codes of the Tzolkin, $13 \times 20 = 260$ KINs.

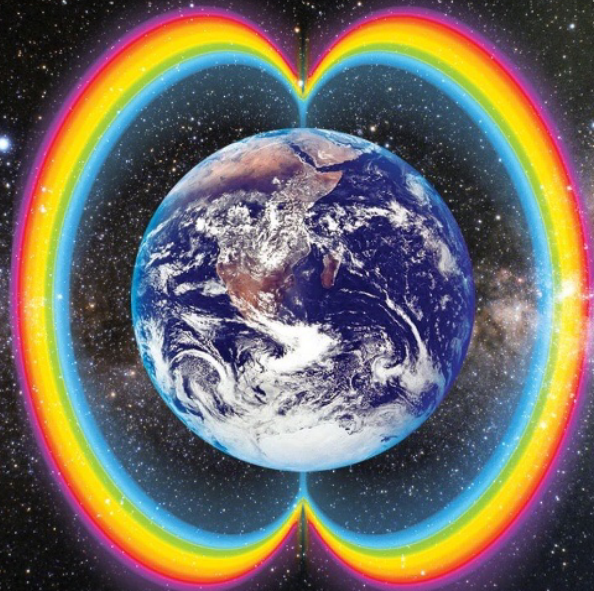

When we are born, we are bearers of one of the 260 KINs, one of the 20 seals and one of the 13 tones.

THE NOOSPHERE & THE CIRCUMPOLAR RAINBOW MEDITATION

Just as the Biosphere is the layer of life on the planet, the Noosphere is the layer of the mind.

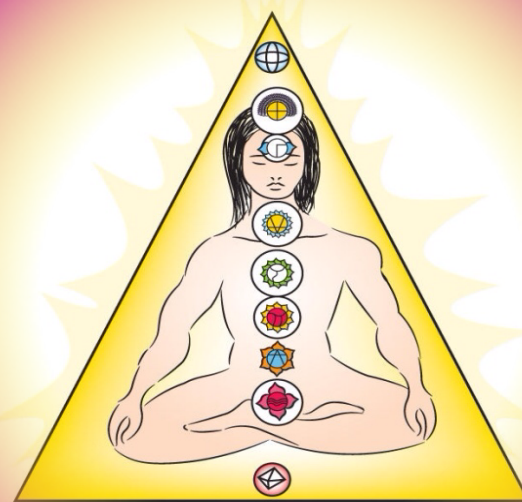

To be aware of the Noosphere is to help the planet become aware of itself. Achieving 5D is nothing other than BEING ONE with the Earth.

One of the most powerful meditations that exists for planetary re-evolution, the circumpolar rainbow meditation, is to imagine the Earth being surrounded by the colors of the rainbow, thus connecting the magnetic poles.

The rainbow nation is the union of all peoples without any type of social, cultural, language or nutritional conditioning.

Do this meditation whenever you want to connect with the heart of the Earth.

SYNCHROGALACTIC YOGA

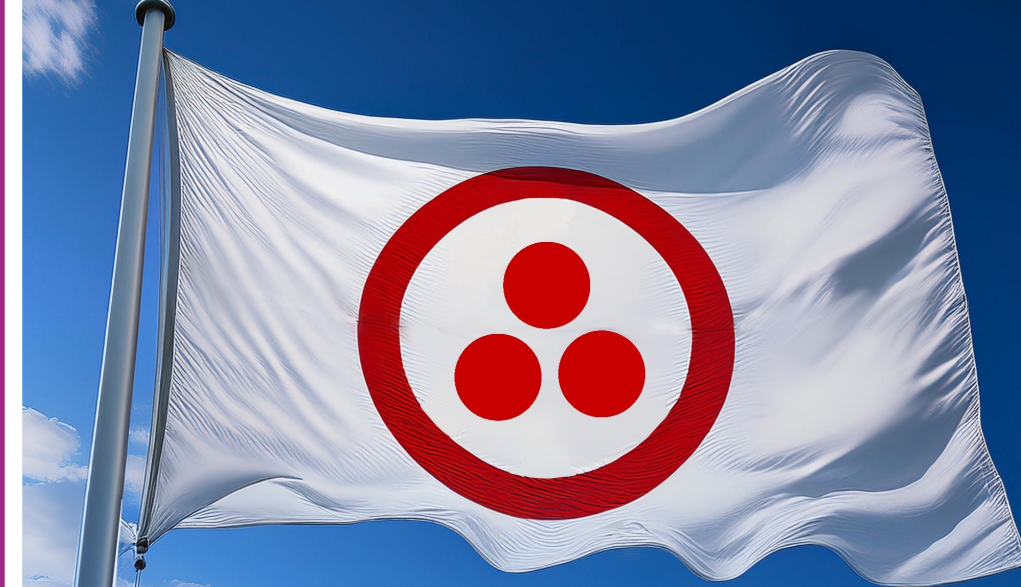

Yoga as a science is one of the main tools to synchronize our body with the mind.

However, although today the vast Western majority sees Yoga as a practice of asanas or postures, 99% of the discipline of Yoga is mental and only 1% is physical. The body is the relative, and the mind is the absolute, therefore infinite.

For the development of Rāja Yoga (Yoga of the Mind) the study of the Yogasutras of Patanjali and the Bhagavad-Gītā is fundamental.

Once the supreme vision of the mind, samadhi, has been achieved, it is then possible to perform Syncrogalactic Yoga where the radial plasmas or chakras are the energy centers that serve to connect the human body with the center of the Earth and the center of the Galaxy or Hunab Ku.

THE BANNER OF PEACE

The banner of peace, a symbol unknown to most, is one of the most important of our time.

The banner of peace synthesizes the intention to unite the parts that are separated in our reality. Disunity is the main cause of all wars.

This symbol, which was presented by Nicholas Roerich, a Russian mystic and artist, delves into the idea that all duality and/or polarity can be neutralized thanks to a 3rd element.

The 3 red dots on the banner of peace represent science, art, and spirituality. The red circle represents culture.

Without peace, there is no culture, and without culture, there is no peace.

THE CYCLIC ORDER

The cyclic order is how the synchronic order manifests itself in the material world.

This means that through the study of the synchronic order we can understand that reality is a relationship of major and minor cycles that occur in time.

To study the cyclic order, we make use of time codes, monitoring the Synchronometer of the 13 Moons and the interaction with the Galactic Compass in the image.

The synchronic order is the mind evolving in time, and the cyclic order is the map where this mind is studied.

To know what role you have to represent from 4D, look for your KIN or galactic signature.

VEGANISM

Adopting a 100% vegan diet is one of the main keys to the evolution of humans as 4D conscious beings.

It is not reasonable to talk about consciousness, spirituality, healing, well-being, yoga, mysticism, mentalism, magic... and at the same time maintain a diet that delves into violence and mass murder of millions of sentient beings, such as animals.

If we study our human body biologically from an evolutionary scale, we are physically made to feed mainly on fruits and vegetables.

Recommendation: Watch documentaries like "Earthlings", "Cowspiracy", "What the Health", "The Game Changers"...

THE SYNCHRONOTRON

The Synchronotron is the most advanced tool to develop the language of telepathy in the humans of the new era.

To understand this matrix of 441 codes (21x21) you must study, understand, and respect each of the basic tools mentioned previously.

The Synchronotron unifies the dimension of number with the dimension of time, the dimension of space, and the dimension of synchronicity.

Telepathy will become like a language once humans have adapted their minds to the reality of synchronic order as the central axis of their lives.

Do your best to change your view of time, only then will your mind change.
